

## To Start Payment of Road Projects In Script

Government Proceeds With Its Plans, Despite Strong Opposition; Certificates To Be About Size of Dollar Bills

By E. B. WINDROSS  
EDMONTON.—Everything is set for the start in issuing script and beginning the road construction work in the province, according to Hon. W. A. Fallow, Minister of Public Works.

The government refuses to be hauled in its plans and despite strong opposition on the part of a section of the press and the financial interests, will go ahead with its plan to issue the "prosperity bonds" and carry out its scheme of road work in about every constituency of the province. It has been said the plan will provide work and pay for thousands of unemployed men.

One instance, at Beverly, where there are 43 families on relief, every one of them will be taken off relief and work will be provided by the works department. The benefits will be equal to this in other sections, according to government spokesmen.

The form of the new script issue has aroused a good deal of interest and it was finally made known during the latter part of the week that the size of the certificate will be about the same as the dollar bills issued by the Bank of Canada.

They will be in one and five dollar denominations, lithographed in colors, principally green, and will not bear any man's likeness, but simply the crest or coat-of-arms of the Province of Alberta, which is familiar with its St. George's cross, the mountains and foothills, wheat fields and grain. On the back of the certificate there will be dated spaces to be covered by the stamps, which will also be issued by the provincial government.

Every precaution is being taken in the paper used and in the lithographing of the script and stamps to make them counterfeit proof.

Almost every scheme connected with the work of carrying out the script plan that would suggest itself has been played up in the public mind one way or another and among them the suggestion that the government would go into the whole grocery business.

The situation that would be created if the wholesalers refused to accept the script in payment of accounts from the retailers. This story has been discounted by Premier Aherbert, who said Friday he or his government have no intention of going into the grocery business.

Simply because there will be no need to do so, sufficient wholesalers having agreed to take the script to make it workable, he said.

One unhappy feature about the situation is the way in which the jobless are increasing in Alberta, said to be due to the publicity given in the newspapers to the prospects.

**Fairview**  
FAIRVIEW.—We are proud of our young folks. Last Friday night they put on their play, "Here Comes Charlie," in a manner that not only did them credit but was also a pleasure to listen to. Every single one seemed to fit into his or her part. They expect to repeat it at Iowalla next Friday evening at 8.30. Better come out and laugh a few hearty laughs away.

Miss Dorothy Gault and Miss Barbara Chesser were week-end visitors at the home of Mr. and Mrs. Brown.

Miss Zimmerman, who teaches at Elkhorn, was a week-end visitor at the home of Mr. and Mrs. S. Ogilvie.

We understand that Eddie Bruns was married in Calgary the last part of last week. It took as if, since the girls have started on the Bruns boys, they won't stop until there are none left. The neighborhood's congratulations, Eddie.

**Large Baptismal Service**  
A very impressive baptismal service was performed by the Rev. Mr. Perrie at Elkhorn school last Sunday evening, when the following young folks, ranging in age from two months to five years, were baptized:

Dennis Joseph Beach, Walter Angus Bragg, Allan Orville Grier, Mildred Elizabeth Grier, Norma Alberta Grier, Annie Marie Grier, James A. Grier, Billy Irving Knad, Douglas Joseph Knad, Mrs. Hugh Rowland rendered a very beautiful solo.

Our industrial road boss is on the job and many needed repairs, such as culverts, etc., are being made.

People of the district are pleased to learn that Mr. William Butcher, who has been on the sick list, is better.

**This Week's Thought**  
He who thinks for himself, and rarely imitates, is a free man.

## FLORENCE HALL POPULAR WINNER OF RADIO CONTEST

Secures First Prize Over Best of Fourteen Other Towns

Competing against a field of 14 of the best radio entertainers from the province, according to Ottawa figures. There is a serious influx of unemployed persons to the province, and it will be necessary to face a very bad situation, which would mean that work can only be given to bona-fide citizens and residents of Alberta who have been here for a stipulated period of time.

The government has repeatedly issued statements designed to prevent this influx of workers from the outside, and they have many times warned that qualifications of residence and citizenship will be required strictly of those given employment or relief. The government officials say they cannot afford to have their plans made operative simply by having to bear the load of unemployed workers from other provinces clogging up the wheels.

Government is willing to give (Continued On Page Four)

## Municipalities Hold Enjoyable Picnic

RIMBEY.—Reeve W. F. Jersey, Councillor George Henderson, Jr., and Secretary W. A. Saunders of the Municipality of Blinman represented this district at the fourth annual picnic held by the members of the Central Alberta Municipalities' Association, at Brownsville's Landing, Gull Lake, Saturday, June 27.

Fine weather favored the gathering and the councillors' ladies provided a most enjoyable picnic supper which added greatly to the day's pleasure.

**Business Meeting Held**  
In addition to a well rounded out program of games and sports, an exceptionally interesting business session proved of benefit to councillors.

Harry Brownlow, Sr., reeve of Lorne M.D. and president of the district Association, presided, and Peter McDonald of Ponoka, secretary of the association, was at his official post. Mr. Baycroft, vice-president, occupied the chair while Mr. Brownlow, who has been a municipal councillor since 1908, addressed the meeting and pointed out the advantages of the various municipal corporations, available to them through an association such as theirs. Of the many mutual benefits derived from co-operation of these central municipal districts, the recent legislation pertaining to free treatment of tuberculosis was an example.

Mr. Brownlow was followed by Mr. A. Frame, district engineer, who gave a comprehensive outline of road work programs in relation to use of Prosperity Bonds. No definite action was taken regarding the meeting in regard to this matter.

Mr. Souty, Deputy Minister of Municipal Affairs, presented a comprehensive study of the financial status of municipal districts for the years 1934 and 1935, favorable in the majority of cases.

**Explains Amendments**  
Mr. J. Beshlow, chief inspector of municipal affairs, explained the new amendments to the Municipal Act and promised further information to follow by report.

The balance of the meeting was given over to the discussion of the weed menace. F. H. Newcombe, district agricultural officer, received word of the advance in southern districts of a particularly obnoxious weed known as the leafy spurge.

Following Reeve Stonehouse's vote of thanks to the ladies, the meeting adjourned to allow participation in the sports.

**Elected President**  
George E. De Long has just returned from the annual meeting of the Western Canadian Society of Agronomy at Swift Current. This organization consists of all men belonging to universities, experimental stations, seed branches, etc., engaged in experimental work with field crops.

After serving as secretary and vice-president Mr. De Long was elected president for the ensuing year. He has taken over the duties that he has been nominated to the directorship of the Canadian Seed Growers' Association.

**LOCAL LIVESTOCK MEN ARE JUDGES**  
Two well known Lacombe livestock men have been selected to act as judges at the Calgary Exhibition and Stampede. S. J. Henderson was the Aberdeen-Angus class and H. E. Wilson will judge the swine.

**ENGAGEMENT ANNOUNCED**  
Mr. and Mrs. H. G. Ahern of Tees announce the engagement of their eldest daughter, Miss Kathleen, to Robert Wynman Shannon, only son of Mr. and Mrs. Robert Shannon of Acadia Valley, Alta., the wedding to take place July 10th.

## WINNER

## SUCCESSFUL W.M.S. Annual Meet Blindman Valley Co-Op. Held

Enjoyable Gathering at Home of Mrs. S. Abbott; Inspirational Talk Is Given by Mrs. A. Newman

One of the largest and most successful W.M.S. rallies in the history of the Lacombe Presbytery, was held at the home of Mrs. S. Abbott on Friday afternoon, June 2. Approximately 60 members attended, representing Wetaskiwin, Spring Valley, Elbow, Ponoka and Lacombe Senior and Evening Auxiliaries.

Miss M. Laycock of Ponoka, who conducted the devotional exercises, urged the members to frequently read the objects of the Missionary Society—Pray, Study, Give—all of which might be summed up as the service of Christian unity in women and children of the world. Previous to the Christian era, the Jewish people had the highest ideal of womanhood, but with the advent of Christ's teaching, women's position had gradually risen to its present standard.

Reports of the various auxiliaries accepted, 78 subscriptions to the Missionary Society, and 69 to World Friends, and the press of the community. Mrs. P. Cull, Spring Valley, was elected to replace Mrs. J. C. McLenzie, as Associate Helpers' secretary.

**Inspiring Talk Given**  
Mrs. A. Newman, a former United Church missionary, gave a most inspirational talk on her work near Lethbridge, Alta. Christ's teaching, she believed, laid emphasis on human personality, so much so that he entrusted his life's work to a group of illiterate and frail men. When you find a church, said Mrs. Newman, without the human personal touch and depending on form and on its various organizations to carry forward its work, then you find a church that is without life.

In illustration of her statement Mrs. Newman gave intimate verbal sketches of several outstanding characters from whom she had gained valuable lessons in friendship during her mission activities.

To appoint a Strangers' secretary does not complete the duty of W.M.S. members, but to tap the tremendous mine of "Adventures in Friendship" which Mrs. E. L. Miesner expressed the appreciation of the gathering to Mrs. Newman for her splendid message.

**Presentations Made At Farewell Party**  
Rev. and Mrs. T. H. Chapman honored prior to leaving for Stettin.

Rev. T. H. Chapman, pastor of St. Cyprian's Church, Lacombe, and Mrs. Chapman and family, were the honored guests at a farewell party sponsored by the congregation and held in the Adelphi Hotel on Friday evening.

Approximately 75 people were present, all delightfully entertained by a variety of games, beginning with a treasure hunt, dancing, community singing and vocal and instrumental music.

Especially pleasing was a quartet number by the Misses Patricia Henly-Lewis, Phoebe and Thelma Brewer and Audrey Sowerby.

G. Montgomery was master of ceremonies and on behalf of the vestry and congregation presented Mr. Chapman with a white stole, the presentation being made by Mrs. H. M. Jones, president. Mrs. Chapman was the recipient of a lovely china cake plate, presented by Mrs. Glasgow, superintendent of the Sunday School, a beautiful luncheon set from Mr. and Mrs. Walter Barker, and a fine leather purse from the Young Women's Guild, the latter presentation having been made by Mrs. Chapman, who has been pastor of the Lacombe church for the past eight years, leaves shortly with his family for Stettin.

**Grain and Livestock Prices**  
Fort William opening spot prices Thursday, July 2:

Wheat

Good bulls..... 82.50 to 82.75

## Around The Town

The town was pretty well deserted on Wednesday, Dominion Day, many of the townpeople taking advantage of the wonderful weather to visit the lakes, while quite a few attended the Ponoka Stampede.

Miss Eileen Irish arrived over the week-end to reside here.

Dr. and Mrs. G. E. Budd will leave tomorrow, July 3, by motor for a visit to Seattle. They expect to be away about two weeks.

Mrs. M. A. Valens from South Orange, N.J., is visiting her son, M. Valens, for a few weeks. Mrs. Valens, who is over 78 years old, made the long journey alone.

Mr. and Mrs. S. Edmunds and son Lawrence, accompanied by Mr. and Mrs. E. E. Reeves, left on Monday for a motor trip to Washington and Idaho.

L. T. Chapman, formerly on the staff of the Lacombe Experimental Station and more recently editor of the North-West Farmer, has now joined the staff of the North American Life Assurance Co. at Winnipeg.

Mrs. T. H. Allison from Kansas City is spending a month's holiday in Lacombe, the guest of her mother, Mrs. K. K. Allison, and her brothers.

Mr. and Mrs. T. Wilks have opened their summer cottage at Gull Lake and will spend a few weeks there with their family.

Rev. C. A. Warren, B.A., who was called from Gull Lake to Stettin, will be inducted into British United congregation on Monday evening, July 6, at 8 o'clock in the evening, at the Bentley Church, by the Presbytery of Lacombe.

## Livestock Problems Are Discussed; Financial Report Shows Extent of Operations; Ladies Hear Address of Miss Goodall, Edmonton

Routine business and reports occupied the larger portion of a well attended annual meeting of the Blindman Valley Co-Operative Association Ltd., held in the Central Alberta Pavilion, Lacombe, on June 30th.

The entire slate of directors was re-elected and one additional added to cover a new district, so that the directors are now:

Elected for One Year — R. E. Chown, Bentley; J. E. Wetzel, Ingle, D. M. Layton, Rimby; P. A. Switzer, Lacombe.

Elected for Two Years — F. J. Smith, Rimby; A. B. Haarsstad, Bentley; E. C. Crowder, Lacombe, and A. McDougall, Thorby.

**Welcomed to Lacombe**  
J. W. Southward was elected chairman of the meeting and a visiting delegation by Mayor E. H. Jones and S. J. Boyd, president of the Lacombe Board of Trade, the latter paying tribute to F. H. Reed, superintendent of the Experimental Station, to whose untiring efforts was due the erection of the beautiful building in the delegation gathered. Many favorable comments on the convenience of the building were expressed by those in attendance.

Financial statement showed shipments made of 1544 cattle, with net returns of \$36,755.04; 23,318 head of sheep, worth \$390,963.72; and 837 head of sheep, worth \$32,331.31. A net deficit of \$757.99 resulted on the year's operations. Considerable discussion ensued regarding the depreciation accounts and the investments of the reserve funds of some \$5500.

**President's Report**  
In his report from the board of directors, President R. E. Chown went into some detail regarding finances and likened the organization to a government. People wondered why the government went into debt and yet kept demanding all kinds of services. He defended the policy of keeping a reserve fund, in that it gave strength to the organization and enabled it to do business on a sound basis. Although holding a reserve fund, the board felt it was not a prudent business move, and Mr. Chown also predicted a deficit for the succeeding year, because the agitation for a change in the grading system from "grading on the hoof" to "grading on the rail," the president maintained that the present system offered greater advantages to the producer.

**Brought Greetings**  
John Reed, president of Medicine Valley Association, in a few brief but forceful remarks, brought greetings and good wishes and urged more co-operative thought and action upon the part of members.

I. H. Newcombe, district agriculturalist of Red Deer, put in a word for Swine Clubs, which are of value not only in teaching the young but also regarding feeding, managing and handling hogs, but also in improving the quality of the hogs.

**Explains Insurance**  
I. V. Parslow, of the livestock commission firm of Parslow & DeLeon, Calgary, explained condemnation insurance, rail grading and animal.

**Spruceville**  
SPRUCEVILLE.—Eleven members from the Spruceville U.F.A. drove to Ponoka Friday to take in the Wetaskiwin Federal Convention. The day was pleasantly passed with business of less discussion and speakers. A play, "Yummy Yummy Yoh," in the evening was followed by a dance.

Mr. and Mrs. Bouter entertained the afternoon at the home of Mr. and Mrs. Dave Bouter and Mrs. Woodrow to dinner last Sunday.

Mrs. Heath, Sr., attended the farewell party to Mr. and Mrs. T. H. Chapman in Lacombe and remained for the week-end, visiting with Mrs. Jones.

The Weekly Nook school trustees held a meeting Monday evening to discuss the new course of studies and regulations, and re-elected Mrs. Heath, Sr. as teacher.

Mr. and Mrs. Nelson Hall were Sunday visitors at the home of Mr. and Mrs. Harry Poudfoot, also Mr. and Mrs. Burton.

Mr. and Mrs. Bob Lawrence, Betty Lawrence, Mrs. S. E. Storey of Regina, Mr. and Mrs. H. J. Ford and Mrs. F. D. Locke, Mrs. Stafford Boyd and Mrs. C. M. Marble were hostesses to a number of their friends at a delightful bridge luncheon at the Country Club on Monday afternoon. The bridge prize was won by Mrs. George Johnson.

Mr. and Mrs. Bob Lawrence, Betty Lawrence, Mrs. S. E. Storey of Regina, Mr. and Mrs. H. J. Ford and Mrs. F. D. Locke, Mrs. Stafford Boyd and Mrs. C. M. Marble were hostesses to a number of their friends at a delightful bridge luncheon at the Country Club on Monday afternoon. The bridge prize was won by Mrs. George Johnson.

answered numerous questions pertaining to these problems.

A resolution that the Blindman Valley Co-Operative Association join with the proposed Alberta Co-Operative Council, carried.

During the luncheon one minute's silence, with all standing, paid a tribute to the memory of the late J. B. Crocker, former director.

Following luncheon, H. E. Wilson, assistant superintendent of livestock, gave a swine demonstration, showing qualities to be developed in bacon type of hogs. This was also made through the piggy and feeding problems discussed.

**Ladies Held Conference**  
During the session, in another part of the building, Miss Jessie Goodall, of the Department of Extension, addressed a large number of women during the afternoon. Many phases of the livestock industry were dealt with by Miss Goodall. "Cooking of foods is an important factor, but with it must be combined the science of the food, the length of life has been prolonged through a knowledge of sanitation, control of contagious diseases, etc.," said Miss Goodall, and just as great benefits are foreseen by applying the science of nutrition.

The women were then taken on a tour of the Experimental Farm grounds, where they were shown the dairy, the poultry and the horticultural gardens.

**Weddings**  
GIBSON—SHARP

A very pretty wedding took place at the home of Mrs. A. M. Sharp on Tuesday, June 30th, when her eldest daughter, Marion, was united in marriage to Mr. Andrew Gibson, son of the late Dr. S. D. Gibson of Lacombe.

The bride looked charming dressed in pink, pink and white, with a pink sash and was attended by her sister Sheila, who wore green organdy over green silk. The bride's mother gave her a gown of green and white, while the bridesmaid carried a bouquet of peonies. Mrs. R. M. Thorne, of Battlement, acted as the bridesmaid. The groom wore a suit of blue and white.

The wedding took place under a canopy of pink and white, with a white and pink floral arrangement. The bride's bouquet was carried by her sister Sheila, who wore green organdy over green silk. The bride's mother gave her a gown of green and white, while the bridesmaid carried a bouquet of peonies. Mrs. R. M. Thorne, of Battlement, acted as the bridesmaid. The groom wore a suit of blue and white.

## WORLD HAPPENINGS BRIEFLY TOLD

This year, railway air services will fly 1,000,000 miles on inland routes in Britain as compared with 600,000 miles in 1934.

The United States senate passed the \$2,488,000,000 deficiency bill carrying in its appropriations for next year's relief program.

Under a new treaty Ireland will ship meat, butter, horses, wool, hides and other products to Germany in exchange for manufactured goods.

J. E. L. Graham of Weyburn, Sask., student of University college, was awarded the fourth year gold medal in political science, it was announced by University of Toronto officials.

Conservation of tin cans as part of the German nation's raw material resources has become obligatory with the navy, the supreme naval command decreed.

Successful experiments in the revival of children's hearts after death were reported by Dr. N. Ostipov, of the Moscow Medical Institute.

Sir Allen B. Aylesworth, Liberal member of the senate for North York, told the upper house if Canada were given the right to amend its own constitution confederation "would not last."

The Canadian Jewish congress resolved "to support all measures designed to intensify the boycott of German goods." The resolution was adopted at the final session of the third annual meeting.

The Union of Canadian Municipalities will meet in Vancouver August 19-20 instead of July 27-29 as previously planned so that the meeting will coincide with the visit of Sir Percy Vincent, Lord Mayor of London.

## Largest All-Welded Vessel

Built in British Shipyard For Service On Great Lakes

The big motorship Franguelin, biggest all-welded vessel in the world, and a sister ship of the ill-fated Joseph Medill, which disappeared last September while making a trans-Atlantic voyage from Newcastle to Montreal, are to be employed on the Great Lakes by the Quebec and Ontario Transportation Company as a newsprint carrier, has been launched from the Walstead plant of Swan, Hunter and Wigham Richardson, Ltd., Newcastle, and will soon leave for Canada.

The Franguelin is the fourth all-welded vessel turned out by the British shipyard which thus far has built about eighty ships of different types for use on the Great Lakes. Her principal dimensions are 206 feet in length and 43 feet in width, and she is classified Lloyd's A1 for service on the Great Lakes and the Gulf of St. Lawrence.

## Vancouver Harbor Master

Perfecting Of Automobile Gave Commander Reed His Job

For more than a quarter of a century Commander A. H. Reed has been harbor-master of Vancouver, and oddly enough, it was the perfecting of the automobile that landed Commander Reed in the position he has held for so long. He retired as shipmaster in 1908 and came ashore with the intention of going into the horse-breeding business. It didn't take him long, however, to discover what every landman already knew: that the day of the horse was passing. So he returned to the seafaring profession, did some marine surveying for the Dominion Government, and eventually was appointed port warden of Vancouver. Though well over 60 years of age, Commander Reed is still a clever amateur boxer.

A train ferry will soon enable railway passengers to go from London to Paris without leaving the train.

Fort Lauderdale, Fla., claims to have the largest fresh water yacht basin in the world.

Soviet Russia now has more women than men studying in its medical schools.

Gas in the World War caused 181,063 known British casualties, which included more than 9,000 deaths.

## Confidence In League

But Herzog Thinks Versailles Treaty Should Be Overhauled

Prime Minister J. B. M. Herzog at Cape Town, learned the post-war Versailles treaty "the world's greatest source of friction" and declared failure of the League of Nations would lead to destruction of civilization.

General Herzog, also minister for external affairs in the Union of South Africa, was speaking in the senate in a debate on the league.

He urged the necessity of revising the treaty, adding: "If war comes, this cursed treaty will be responsible."

The debate was on a motion by Dr. Thomas Visser, vice-president of the senate, that activities of the league be limited to the interests of world peace and the application of pacifist measures. Dr. Visser charged the league, as constituted at present, with "hypocrisy and subversion" to Great Britain, France and Soviet Russia.

Dr. D. F. Malan, leader of the National party, moved an amendment to Dr. Visser's motion, that the league should convene a world conference and should itself be revised in the light of its own experiences. He added that a plebiscite in any country in the world would result in a vote for peace.

General Herzog expressed confidence the league would yet attain its high ideals. Its failure would lead to the destruction of civilization. Concluding, Herzog said no one could condemn Great Britain for not disarming, because she was the one country which has done her best in this respect.

## Business Was Brisk

Operators On R.M.S. Queen Mary Had Plenty To Do

Radio, wireless and telephone communications handled aboard R.M.S. Queen Mary from the time of departure from Southampton until the arrival at New York, included more than 90,000 words of press despatches sent and received, constituted an unprecedented volume aboard a merchant liner.

Although 14 operators worked at one time for a period of 36 hours without sleep, it was impossible for them to keep up with the demand for service.

There were 1,177 radio messages sent, totalling 62,591 words, and 975 messages received, totalling 18,826 words. In addition, about 10,000 words were received from the Canadian Press and other sources for the ship's newspaper.

There were 42 incoming Atlantic telephone calls completed for a total of 241 minutes and 52 outgoing calls for a total of 312 minutes.

The ship established a record for Atlantic telephone service, probably because she is equipped with a secrecy device preventing other persons from listening in.

The longest calls from the ship were to South Africa, approximately 8,000 miles. Also there were two separate calls simultaneously to London and New York.

She sailed with stamps sufficient to meet what was expected to be an extraordinary demand. Before she was well out, the library was selling only small quantities at a time. She had 25,000 picture postcards aboard. All were gone by the end of the trip.

## Policy Of Economy

Six Government Departments Consolidated Under Two Ministers

Six departments of government are consolidated under two ministers in twin bills introduced in the House of Commons without debate by Prime Minister Mackenzie King. They comply with an undertaking given in the speech from the throne, and the actual consolidation has already been carried out in a large measure.

Railways and canals and marine, which each had a separate minister in the last government, are combined under "the minister of transport," Hon. C. D. Howe, who has been administering them since the government took office.

Interior mines, immigration and colonization, and Indian affairs will become "the department of mines, resources and colonization," under Hon. T. A. Crerar, who has been responsible for them since the change in government.

These four departments were divided between the ministers of the interior, mines and immigration in the last government.

Economy and simplification of government were the reasons for making the change, the prime minister said. Much duplication of effort would be avoided and a great saving in salaries would be effected.

The League of Nations committee on suppression of drugs was told production of a certain narcotic (heroin) in Shanghai during 1934 exceeded between 12 and 14 times the legitimate requirements of the world.

Natives of some African tribes bake their bread in ant-hill ovens. Large holes are scooped out in the covering ant-hill and a stone slab is used as a door.

St. Paul's Cathedral, London, was 35 years in building. 2154

## Airmen Are Honored

Recognition Of Achievements In Flight Across Antarctic

Honorary rank of air commodore has been conferred on H. Hollick-Kenyon, and that of honorary group captain on J. H. Lymburner, it was announced by Defence Minister Jan Mackenzie. These distinctions have been awarded in recognition of the achievement of the two recipients in connection with their aeroplane flight across the Antarctic continent.

These Canadian aviators, both of whom have had years of experience in Arctic flying in northern Canada, were selected by Sir Hubert Wilkins to act as pilots for the Lincoln Ellsworth trans-Antarctic expedition. Hollick-Kenyon was chosen for his special qualifications as an air navigator; Mr. Lymburner as an air engineer. Hollick-Kenyon acted as pilot on the flight hailed in aviation circles as an achievement without parallel in the history of flying. Upon Mr. Lymburner's ability depended the airworthiness of the plane for this feat.

Hollick-Kenyon and Lymburner are British subjects of long residence in Canada. The former served as a pilot with the Canadian Expeditionary Force, and later with the Royal Air Force. He was wounded on active service.

"The achievement of these two Canadian aviators was the fruit of unique experience gained in Canada. It is recognized as a great exploit, equivalent in its day to those of Alcock and Brown, Lindbergh and Kingsford-Smith," said Mr. Mackenzie, in making the announcement.

"It is the desire of the Canadian government to express in this award of honorary rank the congratulations of the whole people of Canada to Hollick-Kenyon and Lymburner for the honor that they have brought to their country."

## Shatterproof Glasses

New Lenses Protect Eyes Of Workers And Children

Among the recent developments in spectacle lenses is the new English lens known as Motex. These lenses cannot be told from the ordinary lenses which shatter to fragments when broken. They can be ground to any strength either in white or colored, single vision or double. Besides correcting any optical defect, the same as any regular lenses, they have the added advantage of protecting the eyes from the danger of having the glasses broken on the face. They are particularly valuable in the case of children, and those engaged in work where there is a possibility of pieces of iron, steel or stone flying in the face. To those engaged in such sports as tennis, badminton, golf, etc., they are an absolute guarantee against injury to the eyes through breakage.

## Railways Most Important

Indispensable For Main Business Of Transport States British Commission

The Royal Commission appointed in Great Britain to inquire into the question of transportation has submitted its final report. Dealing with the question of railways, the report sums up, "We are profoundly conscious of the importance of maintaining an efficient and prosperous railway system. Railways are far from having been rendered obsolete by newer forms of transport, air, stage coaches, and, to a considerable extent, canals were when railway purposes—in fact for the main business of transport—they are indispensable, even though newer forms of transport have, in some ways, modified the position they previously held."

You can't fatten a hog by feeding it occasionally, and a prosperous business can't be built up by advertising occasionally.

## Will Be Well Represented

Prominent Canadians Going To Coronation Next Year

Canada, as in the case of previous coronations, will be well represented at Westminster when King Edward is crowned May 12, 1937. Prime Minister Mackenzie King and a large section of the Dominion privy council will attend, as will probably opposition leader R. B. Bennett and many other leaders and members in the House of Commons and Senate.

The champion athlete in bed with a cold was told that he had a temperature.

"How high is it, doctor?" he wanted to know.

"A hundred and one."

"What's the world's record?"

Great Britain now has 90,000 persons with incomes exceeding \$10,000 a year.

Grenoble, France, recently had a rain of thousands of green frogs.

## Colorful Motif In Simple Stitchery

PATTERN 5528

What a refreshing note for any bedroom—this spread with its daintily embroidered motif! The charming patchwork gives you a chance to adorn your hoop-skirt with gay, flower patches, cut from scraps, while her companion and garden come to life with only the merest touch of French knots, outlining the lazy stitch. You'll note there's a bolter motif in the match—so do hurry, and you can enjoy this lovely needlework all summer.

In pattern 5528 you will find a transfer pattern of a motif 15 x 16 inches and a motif 4 x 15 inches; material requirements; illustrations of all stitches needed; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## INVESTIGATED LEAKAGES

Mr. Justice Porter walking to the London Law Courts to preside at the alleged leakage of Budget secrets. A number of prominent people took out insurance policies with Lloyd's against increased taxation of tea and income tax prior to the reading of the Budget in the House of Commons.

## Luxury Travel In Russia

Soviet Boudoir Train Said To Be Marvel Of Convenience

A Soviet boudoir train which makes the luxury trains of other European countries look like stage-coaches was on an experimental run recently to Sochi, summer resort in the Crimea.

The least of its appointments is a barber shop—cosmetologic trains have those. It also carries a nursery car with toys, complete bath compartments, individual radios and a train crew dressed in the manner of hotel doormen.

Passengers may rent pyjamas and slippers aboard the train in order to travel in all the comfort of their own boudoirs. Each of the chairs can be separated from the others by curtains, providing perfect solitude for those who like it.

Women may obtain needles, thread, and yarns with which to while away the time, merely for the asking. A tailor shop is ready for business at all hours so no one need arrive at the end of the journey in wrinkled or soiled clothing.

## Drill For Gas

Rehabilitation Work To Be Extended In Alberta Area

New phase of agricultural rehabilitation has been introduced with the decision of the water development committee of the Prairie Farm Rehabilitation Act to drill for gas at Altus, Alberta.

This decision was reached at a meeting of officers of the P.F.R.A. and Alberta representatives in Regina. Expenditure for drilling operations is limited to \$5,000.

If natural gas is found in sufficient quantities, it will be used as fuel for gas engines to pump water to the surrounding district for irrigation purposes.

The work is in the nature of a test to prove the feasibility of this phase of rehabilitation work. If found practicable, it may be employed in other districts.

Principle followed by the committee in rehabilitation work is that the work must benefit agriculture and a gas well in the Altus district would be of immense benefit in that respect.

Altus is located in the east central portion of Alberta in one of the worst dried out districts of that province. The district has been surveyed by a Dominion geologist and his reports are very favorable. The area which could be irrigated covers some 15,000 acres in the Berry creek district, a tributary to the Red Deer river. The water would be pumped from the Red Deer river to adjacent creek bottom lands for the production of food.

Present at the meeting were: John Vallance, senior rehabilitation officer; L. C. Charlesworth, director of water resources office, Edmonton; B. Russell, senior engineer, and W. L. Jacobson, secretary. Other Alberta projects on which work is progressing were discussed.

## Poacher Meant Something

Lord Tweedsmuir Admitted Being One In His Youth

James "Scotty" Hamilton, a native of Peebleshire, Scotland, Lord Tweedsmuir's home town, on the banks of the Tweed River, was among the present when his Excellency met a group of veterans at the Canadian Legion headquarters during his visit to Stratford, Ontario.

Hamilton wore a badge on his coat lapel which read "Peebles Special Constable." The Governor-General recognized it. After "Scotty" told his Excellency he was familiar with the old Tweedsmuir estate at Peebleshire, he was asked if he was a poacher.

With a rather sheepish grin, Hamilton admitted he was when a boy.

"So was I," as the rather unexpected rejoinder of the distinguished visitor.

It was later explained it is against the law to take fish from the river in Scotland, but apparently a boy wasn't anybody unless he became known as a "poacher" back in Peebleshire, Scotland.

## Head Of League Society

Sir Robert Falconer Re-Elected President Of Canadian Group

Sir Robert Falconer, former president of the University of Toronto, was re-elected president of the League of Nations Society, the society announced in a communique released at the end of its convention in Ottawa.

John W. Dufour, editor of the Winnipeg Free Press, was elected honorary vice-president, and Dr. W. R. C. Wallace, newly-named president of Queen's University, Kingston, Ont., was added to the list of active vice-presidents.

The communique said the society directed a special plea to former soldiers and members of the active defence forces to help in carrying out its program for peace.

## Medical Progress

Show Anuslet Bracelet Worn By Patients In 600 B.C.

Twenty-five centuries of medical progress were graphically illustrated in the scientific exhibits on display at convention headquarters of the 56th annual meeting of the Ontario Medical Association in London.

Most ancient of all medical treatments shown was an anuslet bracelet worn by patients in 600 B.C. It was supposed of protect the wearer from various ailments caused by evil spirits.

Among the modern instruments, was the "glass boot," similar to the one used to treat the feet of Alfred Scadding, Toronto, who was entombed for 11 days in the Moose River mine.

Airman (after landing in a tree): "I was trying to make a new record." Farmer: "You did. You're the first man to climb down that tree before climbing up it."

Allowing 30 years to a generation, an individual living to-day has over 500 ancestors from the year 1700 to the present.

She: You think more of that old wireless set than you do of me."

He: "Well, I get less interference from it."

## Requires Team Work

Nations Must Not Be Divided If League Is Success

That the British Government should make one more gallant effort to rescue the noble idea of a League of Nations is quite in keeping with the record and character of the British people who "never know when they are beaten."

If France had been as willing to check Japan in Manchuria as was the United States—a non-member of the League—Japan would never have colonized Manchuria. But they were not willing to follow the American lead.

The real weakness of the League has been the divided counsels of its leading members, but no change in the Covenant will overcome this obstacle. The more Big Powers we get into the League, the more likely will be this antagonism between rival national interests.

Montreal Star.

## A Remarkable Discovery

Enables Blind To Read From Ordinary Printed Page

Discovery of an apparatus which enables blind persons to "read" an ordinary printed page through a series of minute electric shocks was announced by Emil Hansen, Northwestern University psychology student at Evanston, Ill.

The apparatus employs a photo-electric cell which converts light reflected from the printed page into the electric energy necessary to produce the shocks.

The "reader" places his hand in a specially constructed wooden "glove". Across the palm of this is a series of nine beads. Through the holes in these beads project the ends of small coils of wire.

Light reflected from the printed page and converted into electrical energy expands these wire coils in different order according to the shape of the particular letter. As these coils expand, their ends touch the hand of the "reader."

After long training, the reader may learn to interpret each different series of shocks into the correct letter.

His inspiration for developing this type of apparatus came from Helen Keller, famed teacher of the blind, Hansen said.

Once Did Flourishing Trade

Carver Of Meerschaum Pipes Is Dead In Vienna

Carving of meerschaum pipes, once a flourishing trade of which Vienna held a virtual monopoly, is dying.

Simon Schild, whose name was famous among the pipe smokers of the world for his artistic work, died there at the age of 68, almost in oblivion. Two other men still survive, but their names are not even mentioned in the list of those killed in action in the Great War.

"I thought you were dead," Col. H. C. Dunlop greeted him when Mew walked into the Dunlop store.

"Not a bit of it," said the war veteran, "I just came up to see what it was all about."

## Was Startled

Man Surprised To See His Name On Cenotaph At Goderich

Charles Mew, Decoration Day visitor from Jackson, Mich., arriving in Goderich, Ont., after an absence of 20 years, was startled when he read his name on the cenotaph in the list of those killed in action in the Great War.

"I thought you were dead," Col. H. C. Dunlop greeted him when Mew walked into the Dunlop store.

"Not a bit of it," said the war veteran, "I just came up to see what it was all about."

## Scanned Public Opinion

Dr. Thomas Ethelbert Page, who has died at the age of 86, was one of the few men who wore with ease unconventional clothes and cared nothing for what people thought, reports the News of the World.

"I like comfort," he would say. "What I look like is my own affair." He took no notice of the small boys who made fun of his amazing trousers, close upon a yard wide, as he supposed to have inspired the "Oxford bags."

The world's longest poem is said to be the great Hindu epic, "The Mahabharata." It was begun in 500 B.C. and finished about 1200 years later.

A steering wheel which has no spokes in its upper half gives improved vision for the automobile driver.

It is said that blue-eyed people are more easily trained, and make better air pilots, than brown-eyed persons.

## Cameromians Die In Style

Great Change Made In Barracks Of Second Battalion

For the 400 men of the second battalion Cameromians (Scottish Rifles) at Quebec Barracks, Borden, "Come to the Cookhouse Door Boys" has now been translated into "Gentlemen, your meal is served."

Snow-white tablecloths cover neatly arranged tables, on which knives, forks, spoons and glasses, and even napkins, are laid out. Vases of flowers from barrack gardens complete the attractiveness.

Food is served up more invitingly and every menu offers alternative dishes.

Soldier waiters in white jackets—cut on the lines of ship's stewards—hover round, replenishing water jugs and clearing away plates.

No longer is there a noise like an air raid; plates are taken away quietly on trolleys.

Men are allowed to wander in for their meals when they please, within limits—and they wear any clothes they choose, provided they are clean, from "full pelf" to "civvies" and "fatigues."

Although the old Scottish custom of pipers walking round the room and playing at meal times has not yet been introduced as a final touch, there is discreet music from loudspeakers.

Major D. A. H. Graham, second in command of the battalion, who has had much to do with bringing about these changes, said:

"We believe this will result in a considerable saving over the old system of 'First come, first served' and 'Grab all you can, because you will not get any more.'"

## Science Set New Record

Wirephoto Gave Newspapers Quick Service On Auto Race

While grimy-faced speed aces were smashing records recently in the annual 500-mile auto race on Indianapolis' famous speedway, science, with a camera and a network of wires, was setting a record, too.

Just 16 minutes after the wave of a checkered flag signalled Lou Meyer's victory, an Associated Press picture of the race finish started moving over a portable wirephoto transmitter to newspapers from coast to coast.

Never before had any picture been transmitted by wire in such a short time after a camera recorded a news event.

While fans were still leaving the speedway, the picture was in newspaper offices on both the Atlantic and Pacific coasts, catching late afternoon papers in the west, and early morning editions in the east.

## Division Of Ethiopia

Creator Of New Roman Empire Names Divisions

All Ethiopia has been divided into five parts by Benito Mussolini, creator of the new Roman empire. His cabinet approved a project by which each part becomes an administrative division. They are:

Entrea—capital, Addis; Amhara—capital, Gondar; Galla and Sidamo—capital, Jimma; Harar—capital, Harar; Somaliland—capital, Mogadiscio.

The cabinet announced each division represented a homogeneous organization, "ethnically, geographically, historically, and politically."

Addis Ababa was named the capital for the new administrative organization of Ethiopia with a viceroys-in-charge, aided by a vice-governor-general and the general staff, the latter handling military matters.

## Going Into Business

Lloyd George Building Shop To Retail Farm Produce

David Lloyd George, remarkably successful as a model farmer, has announced he will enter the retail business. The war-time prime minister said he was having a roadside shop built near his estate at Churt, Surrey, which will stock fresh fruit, vegetables, flowers, eggs, honey and jam. It is hoped the produce will appeal especially to the passing stream of motorists.

Somebody is always doing what somebody else said couldn't be done.

Still when you see a car so old you feel it must be paid for.

These don't taste like  
YOUR Pickles,  
Mother!

Mother was disappointed. She thought she had taken such care to have her mustard pickles just right. It was all the fault of that cheap mustard she had used, thinking to save a few cents.

It is the pure mustard that gives pickles their flavor and zest. Next time, mother will use KEEN'S D.S.F. MUSTARD.

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superbly grinding ensures the full mustard flavor.

Original tin for as little as 10¢.

KEEN'S D.S.F. Mustard

FLEMING'S FOLLY

— BY —  
LAWRENCE A. KEBATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread".

Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is unharmed. Buzz is arrested and sentenced to three years' imprisonment.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for payment of wages for work on the dam. Roger Kilgo and Jackpot meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz has had several drinks. Roger has distorted the facts concerning the dam proposal.

Buzz, infuriated with Roger and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming that she has been robbed of \$200 that she had obtained from the bank.

On their arrival home they were met by a couple of Link's workmen, who told Fleming that there was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery and promised them their wages as soon as possible. The men reluctantly returned to work.

Fleming finds Roger and Jackpot, who are making trouble among the workmen, and orders them out of his place at the point of his gun. Both Jackpot and Roger swear revenge. Fleming tells Fleming to carry his gun with him, as he would shoot him the next time they met.

Buzz Hamilton goes to Fleming and asks that power of attorney given him to manage the Triple H. He argues that responsibility would be the best way to help him to get back his self-respect and social standing. Link, sensing this was Roger Kilgo's suggestion, refuses, and tells Buzz his sister's rights are protected, and that if one dies the other party to the dam agreement gets the whole of the property. Hamilton then matches Fleming's gun from his holster and tries to shoot him. Link knocks him senseless, helps Buzz to recover, and then leaves him.

Later, as he was riding towards the dam, Fleming is shot at by a couple of riders, whom he recognizes as Kilgo and Buzz. Then he goes towards the dam. He hears a series of small explosions. He hurries to the dam to find there has been a landslide and two of his workmen are injured.

(Now Go On With The Story)

CHAPTER XVII.—Continued

"Any time now, Well, Marty?"

Buzz gestured for him to step inside the telephone office. "Ralph's

BOOK ON BASEBALL!

Every boy and baseball fan will want this up-to-date book, "Baseball—How to Play It," by Frank J. (Shag) Shaughnessy, Manager of the pennant-winning Montreal Royals.

Picking, batting, base-running—all the fine points of the game are clearly explained and illustrated. Here's how to get it. Simply send in the address below a "CROWN BRAND" or "LILLY WHITE" Corn Syrup label with your name and address and the words "Baseball Book" plainly written on the back—and your copy will be mailed to you right away.

EDWARDSBURG CROWN BRAND CORN SYRUP

THE FAMOUS ENERGY FOOD

The CANADA STARCH COMPANY Limited 287 Stanley Street, Winnipeg, Man.,

Wearing Well

Link whistled. "That's the most real money I've seen for some time, Marty."

The other nodded, finished his count, and went over it again. Waco Byrne's interested eyes made Fleming smile. "You can tell the Star Loop men, I'll pay them off soon as I get these bills changed. Maybe I could pay the Triple H men too, but that isn't really my business." He accepted the large-denomination bills and edged them carefully into his pigskin wallet.

"Sign here, Link," Bush moved a paper toward him.

Taking up a pen, he wrote his name. "Much obliged. Eight thousand dollars!" He grinned and stood up. "That means the completion of the dam, gentlemen. And maybe I won't be glad when this load is off my shoulders!"

They smiled at his wry grimace. "Better be careful of that money, Link. It'd buy quite a little for almost anyone."

Byrne had left the office and was informing his five hands what Link had said about wages. The Star Loop owner nodded. "I've kind of been on the watch while the beef was being moved here," he said slowly. "However, there's no hunter's trouble."

"You don't have to—dryly. 'Seem to get into it of your own accord. Say, and if you go to town to change that cash smaller, look out for Mell. He's spread it far 'n' wide he'll kill you."

Bush walked out of the place with a laugh that masked the inner tenacity of him—for he felt an unshakable hunch that this, perhaps, was the fateful day for the meeting. Nevertheless, he had no intention of spoiling a showdown with the Hat Moon Saloon owner. It might as well come today as tomorrow.

Buzz waved adieu from the doorway. Far down the curling wagon-track road Link saw Waco and the others heading eagerly to town. The three men rode off to refreshment such as the Half Moon offered. In another direction the Triple H men rode, going back to their spread. Before Link was well started one group had disappeared over the crest of the range, the other around the fringe of dead cedars that lined the road.

As he touched spurs to his mount he reflected what this money in his trousers pocket meant to the irrigation project. He must pay off the workers at the dam, pay for certain materials long overdue, and of course divide with Helen Hamilton for her two hundred-odd steers. But it could be done; the cash, he thought as he broke into a whistle, would just reach.

The knot of cedars was on his left, while across the road lay jagged red rock boulders. Suddenly a horseman started from the trees. Metal gleamed in the sun, and with a start Link glimpsed two Colts directed his way.

He muttered an exclamation. His jewels touched the mustang, which jerked under him. At the same instant he bent low over the beast's mane and snatched at the forty-five on his thigh.

From the boulders a shout roared like a gun. Link saw that instinctively Fleming alone. His own gun, not yet drawn, slid back into its holster. Another slug ripped the mustang's nose.

"Don't draw or you're a dead man!" That tone was authoritative and confident. Out of the corner of his eyes Link saw the second horseman sitting straight in the saddle, squinting at another point of the bluish barrel of his Winchester.

He was covered. It would be worse than useless to run or dive for his weapon—rank suicide. With a muttered curse he released the reins as his mount slowed and twenty feet from the two-gun man.

"Up with yore hands, Fleming!" Reluctantly he complied. His rifleman spurred his mount nearer, exchanging his Winchester for a six-gun. He was of medium height, curly of build, wearing a solid and mottled flannel shirt patterned in large checkers. His face was effectively hidden beneath a bandana that permitted only a narrow glimpse of eyes under the low-pulled antithill hair.

The second holdup was dressed in nondescript garments. He seemed less at ease in the saddle than the first. "Stand still!" he growled, then edged close while his comrade dismounted and came forward.

"I'll have the money first; then I'll take the gun myself. And don't make a bad move, Fleming!" He was thinking fast. Dared he risk a draw. But those menacing Colts spelled certain death for a wrong move. Link's cheek quivered angrily.

"Suppose you know the penalty for this is twenty years or more?"

"Don't talk. Just stick yore fingers in yore pants pocket—left side—and haul out that cash. Quick now!"

He obeyed as slowly as possible. But the guns did not waver, nor the beady eyes above the mask that stared down the shining barrels. He clutched the wallet containing nearly eight thousand dollars, and slowly, reluctantly extended it.

The man on the ground matched it. Impotent rage that had been

WAKE UP YOUR LIVER BILE

And You'll Jump Out of Bed in the Morning Ready to Go

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes three good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel like a new man. Ask for Carter's Little Liver Pills by name! Stick to the name! No other pills are the same.

Know The Orient

Late Editor Said Future Of White Race Bound Up With Asia

The future of the white race is inevitably bound up with the "rising millions" of Asia, Robert Cromie, late publisher of the Vancouver Sun, said during an address after his return from an Eastern tour.

Mr. Cromie made his address a few days before his sudden death. He was considered an authority on questions relating to the Orient, where he had travelled extensively.

The western hemisphere, he said, "must become conscious of Asia. Europe's population of 350,000,000 people is supporting a population of 70,000,000 as against the 700,000 in this province," he said.

"China, the philosopher, fears Japan, the warrior," he said. He did not believe that Asia would attempt to encroach on the white races settled in Australia. He advocated an understanding attitude on the part of Australia and a lessening of rigid immigration barriers, as a means of improving relations between the white races and the East.

Learning Sign Language

Chimpanzees In London Zoo Get Bored Very Quickly

There is a schoolroom in the London Zoo where lessons are conducted in absolute silence and only two pupils attend. They are Mick and George, three-year-old chimpanzees, who are being taught to "talk" in the sign language used by primitive man before he mastered the art of speech.

The curriculum has been drawn up by Sir Richard Paget, authority on phonetics, and their "schoolmaster" is G. Stonor of the Zoo staff.

"I've been teaching them for about six weeks," Stonor declares. "The only sign they react to immediately is one which tells them on which side of the cage their food is coming."

"The signs I am making to them at present concern only food. I hold up a finger and pretend to peel it, as if it were a banana. I do this several times, and then produce a banana."

"The sign for an apple is almost the same, except that I draw it downwards from my mouth, for monkeys bite an apple with their lower teeth."

"So far the chimps have watched everything with great interest, but I only teach them for 30 or 40 minutes a day, as they quickly get bored."

All Geared Up

A motorist was being charged with dangerous driving along a country lane.

"Is it a fact," asked the magistrate of the policeman in the witness box, "that the defendant's car went around the corner at 30 miles an hour?"

The policeman nodded. "Yes, sir, it must have been that," he said.

"And what gear was he in?" was the magistrate's next question.

"At this the policeman scratched his head and looked puzzled. "He was travelling too fast for me to see properly, sir," he said, "but I remember he had a bowler hat and a green scarf on."

More than 1,000,000 pounds of toilet soaps were imported into the Philippines in the last year.

In Assam, India, 67 feet of rain has fallen in a single year.

Maps Of Canadian Waters

Japanese Fishermen On B.C. Coast Make Best Use

Canada is so far behind the times in map-making that Japanese fishermen operating along the coast of British Columbia have better maps of Canadian waters than any available in Canada. This bit of information was given the House of Commons by Thomas Reid (Lib. New Westminster) and confirmed by Conservative Leader Bennett when an item of \$134,600 was approved for geodetic surveys.

Bengal Tigers Kill Many

Almost every month of the year, a man, a woman or a child is killed by a tiger in Bengal. This fact is revealed in the Bengal government report on forest administration for the year ended March 21, 1936, just issued at Calcutta. Tigers were responsible for the deaths of 46 human beings during this period.

Horseless vehicles should be run with horse sense.

Old Tradition Broken

When Lord Minto Succeeded Curzon As Viceroy To India

A few days ago we referred to a tradition that the incoming and outgoing Viceroy should never meet on Indian soil, a tradition that was involuntarily broken by Lord Curzon when succeeded by Lord Minto.

A correspondent now sends the true story of that meeting.

Curzon, for so long almost independent of the home government, suffered an inexpressible blow to his pride when he was forced to resign. Moreover, he was humiliated because he did not consider Minto a sufficiently brilliant successor.

"Imagine sending to succeed me a gentleman who only jumps hedges!" he exclaimed on hearing the news.

(Minto had won the French Grand National and had ridden four times at Aintree.)

The "affront" still rankling, he refused to send the usual warship to Aiden to escort the new Viceroy.

When Minto arrived in Bombay there was no official reception and the party was kept hanging about for several hours.

Curzon made no appearance until the new Viceroy had actually entered Government House. Then he came down—in a shooting coat and slippers!

It is, of course, a rule that the new and old Viceroy should meet in pomp and ceremony and the incoming be treated with the respect due to a representative of the King—London Daily Sketch.

Isolated Community

Goods Are Ordered In December For August Delivery

Belief that Fort Nelson, B.C., about 550 miles northwest of Edmonton, is one of the most isolated communities in western Canada was expressed by Major R. W. Hale, Edmonton postal district superintendent, after an aeroplane trip there.

It is served in the summer by a pack train and one supply boat. Goods are ordered in December for August delivery. For four months each year the place is cut off from the outside world.

There is no radio, and if people wish to send messages, they must walk there. There are 100 white settlers, and 150 Indians in the district, all trapping.

Pilot Grant McDonald, who took Major Hale on the flight, had some eggs along. They sold at \$1 a dozen.

Courtesy On The Highway

Dim Your Headlights When Passing Car Going In Opposite Direction

Modern automobiles are equipped with headlights that penetrate the darkness and lessen the dangers of night driving. But such powerful lights, unless dimmed, are blinding to motorists travelling in opposite direction and frequently cause fatal accidents. Be courteous and dim your headlights when passing a car going in the opposite direction. By so doing you will help lessen automobile accidents.

Men Make Best Cooks

Bring Scientific Viewpoint To Kitchen Opinion Of Teacher

Mrs. Margaret Metzger, who teaches cooking and home economics to ten men and boys at Dewey, New York, says that men make better students than women.

"Men bring a scientific viewpoint to the kitchen," Mrs. Metzger said. "Their work is thorough."

Mrs. Metzger teaches in a home economics class for men conducted by the Works Progress Administration and the State Education Department.

Someone points out there are four "graves" of individuality. They stand for industry, intelligence, initiative and imagination. Ah, yes, and those "is" have it.

The beauty of a radio news bulletin is that if you fail to catch part of it you can always get out the paper and see what it was.

Automobiles are appearing in many villages of White Russia for the first time.

Little Helps For This Week

Be not overcome of evil, but overcome evil with good. Romans 12:12.

Come in this accepted hour; Bring Thy heavenly kingdom in; Fill us with Thy glorious power; Rooting out the seeds of sin.

If we wish to overcome evil we must overcome it by good. There are doubtless many ways of overcoming evil in our own hearts, but the simplest and most universal is to overcome it by active occupation in some good word or work. The best antidote against evil of all kinds, against the evil thoughts that haunt the soul, against the needless perplexities which distract the conscience, is to keep hold of the good we have. Impure thoughts will not stand against pure words and prayers and deeds. Little doubts will not avail against great certainties. Fix your affections on things above, and then you will be less and less troubled by the cares, the temptations and the troubles of things on earth.—A. P. Stanley.

Snuff Habit Revived

Dealers In Britain Report Big Increase In Sales

Snuff has "come back" in the United Kingdom. In the shops of some well-known tobacco merchants and dealers in snuff in London, it is stated that in the past three years snuff-takers have increased by nearly 1,000 per cent.

The new snuff-takers are grouped into two classes—those of the old family customers who had lapsed in their snuff orders for a generation or so and have now returned to it, and the younger men and women. The result has been that new brands and blends have had to be evolved, though it is largely left to the old and the very young to support those peddling blends which have come down unchanged in their recipes from the 18th century.

England's Five Richest Men

Wealthiest Of Them All Has Twice Refused A Title

England's five richest men: Lord Hugh Richard Arthur Grosvenor, second Duke of Westminster; Lord John Darnley; Lord John Russell; Lord John Russell; Lord John Russell.

Shy Sir John Russell Elected Harrold Harmsworth, Viscount Rothermere, a newspaper.

William Richard Morris, Baron Nuffield, automobile.

Joseph Rank, flour mills.

Plain Joe Rank, probably richest of all, is the only one without a title. He has refused one twice, saying: "I'm Joe Rank to everyone. They wouldn't know me as 'Sir Joseph'."

World's Largest Sapphire

Weights 42 Pounds And Is Valued At \$15,000

The world's largest sapphire, more than 12 pounds heavier than its nearest rival, and worth about \$15,000, is now in London. Discovered in Ceylon nearly a year ago, it has been sent over by the government of Ceylon for expert examination and disposal. In the workshop of a west end lapidary a reporter was permitted to handle the stone. It takes some handling, too, for its weight is 42 pounds or in terms of jewelry, 100,800 carats.

All crows are not black; the hooded crow, of Europe, is mostly grey.

In our latitudes, we cannot see rainbows in the middle of the day.

Iron the Easy Way

Coleman

Price as Low as \$2.98

1. Come only 16 in. long and 10 in. wide. 2. Takes less time to iron. 3. Heat is a few seconds. 4. Quickly ready for use. 5. Most economical. 6. Holds the iron in the place. 7. Irons with ease. 8. No need to build. 9. No time to build. 10. No need to build.

## Blackfalds

**BLACKFALDS.**—The hot and heavy winds of the past week have dried the fields out badly and they have also damaged the gardens to some extent and a good rain in the near future would be beneficial. The high school exams finished this week, to the relief of most pupils, and school closed on June 30th. At the last meeting of the School Board the question arose of having a third room to accommo-

date Grade XII. during the new school year. It was decided to put this matter before the ratepayers at a public meeting to be held within the next two weeks.

**Doubleheader Played.**—A doubleheader ball game was played here against Minlaw Sunday last and the honors were evenly divided. The visitors took the first game by a 5-4 score and Blackfalds the second by 4-3. Wes Fizzle of Lacombe pitched for the locals in the first game, while John Bennett ably twirled in the night-cap. Both games were very interesting.

Miss Elsie Walker returned to the Holy Cross Hospital, Calgary last Saturday, having completed her holidays, and the same day, Miss Doris Miller came home for her holidays from the same hospital.

The meeting held last Thursday to discuss the new hall was a disappointing failure, for even less attended than were at the first meeting. After waiting for some time, it was decided to adjourn the meeting until such time that the community showed more interest in the undertaking. There is some talk of purchasing the Church Hall and altering it to meet the needs of a community hall, but considerable more support will have to be given to the venture to be able to make a success of it.

Plans are now well advanced for our Sports Day, to be held next week, and it is expected to be a huge success.

Mr. Pat Miller was home for the week-end, as also was Mr. John Hedenmark.

Mrs. Jessie Sorenson left for the south last week. She expects to be a few days in Calgary before rejoining her husband in Vancouver.

**Returns to Edmonton.**—Miss Ethel Lawton was here for the week-end after spending her holidays at the coast. She left on Sunday to rejoin the Bank of Commerce staff in Edmonton.

Miss Martha Rits, who resigned her position in the Royal Bank at Morinville over two months ago, owing to ill health, is still on the sick list and spent a few days in the Royal Alexandra Hospital, Edmonton, last week under observation.

Mrs. Cadman and daughter Edith left on Monday by bus for Gleichen to attend the marriage of the former's brother.

Miss Ella Myrland is here from the Peace River on visit, she has just completed a beauty parlor course in Edmonton.

The former Mrs. Bill Petro is visiting at the Loggins home.

**Farewell Service Held.**—The Rev. Mr. Chapman held his farewell service at the Anglican Church last Sunday, before proceeding to his new charge at Stettler, and bade farewell to the Sunday School and others of his parishioners. The Sunday School will be continued for the next two Sundays—possibly longer—by Mrs. Warren, before closing until the Fall. Special thanks are due to Miss Edith Cadman for so kindly donating her services at the organ, regularly every Sunday, and also teaching one of the junior classes during the year.

## Colman Reaches Drama Heights in Picture at Avalon

Sweeping across the screen with a power seldom equaled and perhaps never surpassed, "A Tale of Two Cities," starring Ronald Colman, will be shown this Thursday, Friday and Saturday nights at the Avalon Theatre, Lacombe.

For a breathless 90 minutes the screen fairly throbs with scenes of romance, of adventure, of spectacular magnitude that make this picture a towering giant of entertainment. It is a picture that every man, woman and child should see.

It presents Ronald Colman as Sydney Carton in a role that eclipses any of his previous achievements—a role which appears to have been tailored to his measure, giving him a full range for his dramatic talents.

The story is familiar to every reader of the works of Charles Dickens. It comes to the screen without major alterations. It tells of the joys and tragedies of a little group of people, English and French, who become embroiled in the sinister workings of the French Revolution of 1789. On the printed page it was a masterpiece of literature—on the screen it becomes a moving, vivid reality in which the elements of entertainment are deftly blended.

## GOING AWAY? THIS WEEK END?

When you return with the drip pan have overflowed... will your food be spoiled? That's the kind of refrigerator you own. You can't tell until it's too late. Days on end and return to find the food within a fresh and wholesome. That's because it's a Westinghouse. Even if the power service is interrupted this unit restores refrigeration automatically! Let us explain this and many other unique features.

## The Churches

## THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary

St. Cyprian's Church, Lacombe  
Incumbent: The Rev. W. E. Herbert  
Licensed Lay Readers: E. H. Jones, R.C. and A. T. Inkpik

Organist: Miss Alice Inkpik  
July 5-4th Sunday After Trinity,  
8:30 a.m.—Holy Communion.  
11:30 a.m.—Morning Prayer.

7:30 p.m.—Evening Prayer.  
The Induction of the Rev. W. E. Herbert will take place at 8 p.m. on Thursday, July 2. A Social Hour will be held afterwards.

St. John's Church, Oliver: 11:00 a.m., Holy Communion.

ST. ANDREW'S UNITED CHURCH  
Rev. R. K. Layton, B.D., Minister  
Services at 11:00 a.m. and 7:30 p.m.  
Sunday School at 11:00 a.m.

Now that the Summer has come, we ought to spend at least an hour a week in worshipping God for His goodness.

Five new members were received into the Church last week.

## CHRISTIAN SCIENCE

At all Christian Science churches next Sunday, the subject of the Lesson-Sermon will be "God." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "O the depth of the riches both of the wisdom and knowledge of God! how unsearchable are His judgments, and His ways past finding out" (Romans 11:33). One of the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is as follows (page 275): "All substance, intelligence, wisdom, being, immortality, cause, and effect belong to God. These are His ways past finding out" (Romans 11:33). One of the infinite divine Principle, Love. No wisdom is wise but His wisdom; no truth is true, no love is lovely, no life is life but the divine; no good is, but the good God bestows."

## Rimby

**RIMBEY.**—The funeral services for the late J. F. Mann, a resident of Hoadley for the past 15 years, were held on Wednesday, June 24, at the family residence at Hoadley.

The body was taken to Rimby, where interment was made in the United Church cemetery.

Mr. Mann, who came to Hoadley, northwest of Rimby, in 1921, from Saskatchewan, had conducted a general store business, a telephone toll office and the post office there, retiring from the latter a few years ago.

He was prominent in the Hoadley district and had much to do with the rapid development and settling of those parts. He at one time owned the land upon which the town of Hoadley now stands. He is survived by his widow, who was in Edmonton when the news of her husband's sudden fatal heart attack was conveyed to her.

Crops around Rimby have never looked better and were greatly benefited by the heavy half hour's downpour last week. The rain was accompanied by a severe electrical storm, which did considerable damage to the Calgary Power lines here, destroying a transformer located near Rimby, blowing several fuses and putting three street lights out of commission. F. Danner of Lacombe was in Rimby inspecting the work and supervising the repair work.

## Many Visitors

Among last week's out of town visitors in Rimby are Miss Gwen Halpin, R.N., of Calgary, the guest of her brother, Dr. H. E. Halpin, and Mrs. Halpin; Miss Dorothy Smith of Ponoka, at the home of Mayor and Mrs. L. S. Cutler; Miss Peggy Gosh of Calgary with Miss Marcella Jackson; Miss Mary Byers, R.N., of Edmonton, who spent the week with her parents, Dr. and Mrs. S. J. N. Byers; Mrs. Edith Rogers, M.L.A., of Ponoka, who attended a business meeting of municipal councillors in Rimby on Thursday; Mrs. H. Spaulding of Billings, Montana, who is spending a week with Mr. and Mrs. F. E. Hawkins of the Centre View district, and Mr. and Mrs. C. W. Iddings of Eugene, Oregon, who motored to Rimby last week to be guests of Mr. Idding's uncle, Mr. T. E. Iddings, and Mrs. Idding. He is and Mrs. Iddings, who extended their trip to include Edmonton, are very much impressed with the scenic and agricultural advantages of Alberta.

## To Start Payment For Work in Script

(Continued from Page One)

earnest consideration to the proposal of Hon. Charles Dunning, federal Minister of Finance, for a national body to confer on provincial and federal finances. The plan would be a substitute for the former proposal of a loan council, but would be entirely on a voluntary basis. There would be no legislation necessary in its organization and it would have no legislative authority but only a consultative function.

Premier Abernethy is non-committal as to what action the provincial government will take with regard to the Dunning proposal, and until he has the complete plan of the federal minister to lay before the Alberta cabinet the premier says he cannot express an opinion as to its probable reception.

It has been finally settled that the program for the visit of Their Excellencies, Lord and Lady Tweedsmuir, to Edmonton on August 13, will include the unveiling of the new cenotaph to the memory of the soldiers who fell in the Great War. A busy day is planned for the viceregal party, with luncheons, dinners,

## Bentley

BENTLEY.—Mr. and Mrs. J. K. Uhl and Mr. and Mrs. R. C. Uhl and daughters, who have been visiting Messrs. Williams and Hergott, left on Thursday last for the return journey to their home at Chico, California.

The school has closed for the summer holidays. The last of the High School exams were written on Tuesday.

Miss Schodopole, the primary teacher, has left for her home at Botha. It is understood Mr. Wilkie is staying in town for a couple of weeks to coach the boys' basketball team, which expects to compete at the Edmonton Exhibition. Later, Mr. and Mrs. Wilkie and daughter will spend part of the summer holidays at Edmonton.

Mr. Damron expects to attend Summer School at Edmonton. Mr. and Mrs. Hergott left on Friday for the coast to round out their holidays.

## Damage by Lightning

Lightning has recently been playing havoc in some places in the district, having set fire to and burned a straw stack at the George Cummings farm, 10 miles north, and on the same night the Surratt farm, located two miles south, was with- out lights for a time owing to the lightning blowing a fuse from the transformer of the Calgary Power line.

On Tuesday, June 23, Mr. Wilkie journeyed to Eckville with the Class C boys' softball team to play the final game of the Red Deer Inspectorate Sports for the championship, which had been postponed from June 6. The Bentley team were victorious to the tune of 15-1.

Miss Mildred Miller, teacher of Outlets School, and the pupils held a school picnic at Gull Lake on Monday.

Sunset School also held a picnic at Meridian Beach, Gull Lake, Monday, the teacher, Mr. Hodditch, being in charge.

Mrs. S. Brooks and Mrs. J. Stephenson acted as joint hostesses in entertaining the Sunset Women's Institute at the home of Mrs. Brooks on Thursday. Mrs. Albert Hansen, who acted as delegate at the Lacombe-Ponoka Constituency Conference, gave a complete and interesting report. The meeting in July will be in the form of a garden party at the home of Mrs. W. W. White.

Mr. and Mrs. T. Cowan and three children of Gadsby arrived recently for a visit with Mrs. Cowan's brother, T. Hunter, and family. Mrs. Norris of Horsburg, a niece of Mrs. Hunter's, accompanied them and will remain for a few days. Miss Lillian Hunter from Winfield was a visitor here last week.

Preaches Farewell Sermon  
Rev. J. McLennan gave his farewell sermon at the Bentley United Church on Sunday evening, prior to his departure for Staveland, where he will be in charge of the work for the coming year. Following the services, the congregation assembled in the club rooms, and Vernon Miles, on behalf of the Sunday School, presented to Mrs. McLennan a silver sandwich tray and olive dish as an appreciation of her work in the Sunday School. Mrs. Ray Miles then voiced the regret of the congregation that Mr. and Mrs. McLennan were being transferred to a new field and wished them future success, and on behalf of the Ladies' Aid and W.M.S. presented them with a radio table.

Rev. and Mrs. McLennan each suitably replied, expressing their regret at leaving friends made during their four years' residence in Bentley, and asking for the help of the congregation to carry on the work with their successors, Rev. Warren of Clive. The ladies then served lunch.

The longest elephant tusk on record measured 11 feet 5 1/2 inches.

## The World of Fact and Fiction

By ART

Not many books on everyday philosophy reach the shelves of small libraries, so "Be Kind to Yourself" by Vash Young, now in the local library, is indeed a treat. It is a 1000 book, fresh from the presses, and the author refers to it as "A Handbook of Happiness." Well worth reading, this, for it tells of many ways to make this world a better place to live in, both for yourself and for others.

It is just 20 years since H.M.S. Galatea, cruising in the North Sea, observed a section of the German fleet appear on the horizon, and hoisted the signal: "Prepare for immediate action—enemy in sight." That was the signal which preceded the Battle of Jutland on May 31st, 1916, and soon Admiral Beatty was forming the plans which were to hold off the invading German battle-ships.

Among Beatty's ships were the flagship Lion, the Queen Mary, the Tiger, Princess Royal, Indefatigable and New Zealand. At 18,500 yards the Lion fired the first shot at 3:48 p.m. and the Battle of Jutland was on. One sailor who was present says, in part: "My goodness, what a sight it was! I have seen some ships in my time, and a good number at a time, but I would hardly have believed there were so many ships in the world as I saw on that Wednesday."

Soon the Indefatigable and Queen Mary were lost. At 4:38 p.m. arrival of the main German fleet was reported by the cruiser Southampton. At 5:56 the leading battleships of Britain's great navy arrived in charge of Sir John Jellicoe, Admiral Arlholm and Rear-Admiral Hood. What a welcome sight they must have made for Beatty! They saved the day for the British, and though it was midnight before the last German ship had turned and fled, the greatest sea attack against England during the Great War had been repulsed.

It was a dramatic and ghastly encounter, for the British lost 14 ships and about 5000 men, while the Germans lost 11 ships and 4600 men.

### WOMEN'S

## Firestone Wins Again at the Indianapolis Speedway for the 17th Consecutive Year

Performance like this must be merited. It shows that the Gun-Dip-Solids, 2 Extra Cord Plies under the Tread and the other extra safe features in Firestone tires are not just claims but realities that make them different and superior to other tires. Choose the tires Champneys buy — see the nearest Firestone Dealer today.

## Lack Of Purchasing Power

One often hears the comment that the prosperity of the cities and towns is dependent upon the prosperity of the farmers, but little is heard of its corollary, namely that the well being of the farmer hinges upon the prosperity of the urban centres, though the one is unquestionably as true as the other.

Possibly the latter has not been heard so frequently in Western Canada as the former because, until very recent times, the farmer's income has been largely derived from an exportable surplus of grain. Under such circumstances the consumer of the bulk of Western Canadian farm products was geographically remote and the fact that the affluence or otherwise of the consumer was of considerable import was but dimly perceived, if recognized at all.

However, this relationship between the Western Canadian producer and the consumer of his products has undergone a change in the past few years and indications are not lacking that the change may be even more accentuated in the next few years.

In the first place, during the past half dozen or so of depression years a substantial percentage of Western Canadian farmers have had little or no income to boast about. Because of a succession of dry years many of them had no crops to sell and others who reaped some wheat or other grains have not received sufficient price to render their work remunerative, partly because of the closing of former markets and partly because of the existence of a big carryover which could not be liquidated, except at tremendous loss.

As a result of their predicament many farmers, even with conditions somewhat more promising, have reduced their acreages seeded to bread grains and are endeavoring to increase their output of other products, including livestock, some of which are finding an outlet to a limited degree in overseas markets and others which, on account of their nature or because of lack of processing facilities, must necessarily be disposed of in local centres.

In the case of those products which are exportable, it is necessary to find new markets or expand existing markets. In the case of products which must be disposed of in local markets, consumption capacity must be increased if the farmer is to be able to dispose of such commodities at a price to yield him a profitable return.

Too frequently, in the past two or three years, farmers have had the experience of hauling or shipping produce to local centres only to find themselves faced with the choice of disposing of them at ruinously low prices or of taking them home again.

The irony of the situation is that in many cases, perhaps in all of them, the produce would have been welcome in the home of the potential local consumers but, because of conditions which made it necessary for the farmer to raise such produce, these people were unable to buy it, or only at such prices as to render the transaction unprofitable to the producer. In other words, the trouble was lack of purchasing power.

There is no question that local markets are capable of consuming a great deal more local produce if the consumer had the necessary purchasing power and this brings us back to the original statement that the well being of the farmer is dependent upon the prosperity of the urban centres and, so far as Western Canada is concerned, this is much more true than it was a few years ago.

If new local markets can be opened up and the purchasing power of the residents of existing local markets can be increased the problem of the farmer will be at least partially solved.

Fortunately there is every reason to hope that the next few years will see the development of new local markets with the discovery of mineral wealth in the northern areas and its development, a process which is being greatly accelerated at the present time.

This coupled with an increasing influx of tourists from other provinces and the United States give ground for belief that new markets for local products are in the making. That the latter has real potentialities, at present principally enjoyed by Eastern Canada and British Columbia, is evidenced in the recent publication of statistics showing that more money was spent in Canada by tourists last year than was realized by the sale of Canadian export wheat.

As for the expansion of existing local markets that is, as already stated, largely a question of purchasing power and how this purchasing power is to be increased is a question which is giving rise to a great deal of thought. Can it be done by some overt action or can it only be brought about by the ordinary evolution of economic processes?

One quiet student of affairs, whose name has never appeared in print and perhaps never will, suggested to the writer recently that it could be brought about almost overnight if ten or a dozen of the big industrial leaders of the nation would gather around a table and agree to increase salaries and wages all round. "Merchants," he said, "give much thought to the purchase and display and sale of their commodities, but little or none to the other half of their business—the ability of the consumers to buy."

### Old Cars Can Take It

Old time motor cars may not be much for speed or looks, but they sure can take it, as Bert Stiquere of Godrich, Ont., will testify. He was dumping a load of ashes from his ancient truck, when its brakes failed and it toppled over an 80-foot cliff. He found it landed right side up and drove it off across the flats with only a windshield broken.

### No Time For Number

Bystander—"Did you get the number of that car that knocked you down, madam?" Victim—"No, but the hussey who was driving it wore a three-piece tweed suit, lined with Canton crepe, and she had on a periwinkle hat, trimmed with artificial cherries."

When a man carries a luck piece it doesn't work unless he dres.

Just wishing for things to happen never gets you anywhere.

## Maintain National Credit

By Meeting Obligations To The Full Extent Of Capacity

Members of Canadian Manufacturers' Association meeting at Quebec, lent approbation to the suggestion by their president, W. S. Morden of Toronto, that Canada, by application of "common sense and some old-fashioned methods, should anticipate the coming years with confidence and satisfaction."

The president, in a comprehensive annual review of world economic conditions presented at the annual convention, noted improvement throughout the world generally during the past year.

He was optimistic of the future but with his optimism came a note of warning against too ready spending and loose borrowings by government.

"One feature in connection with the increase of public debt that is giving concern to many individuals and business men," he said, "is the increasing proportion of government obligations that is being acquired by banking institutions. It is, of course, a sound banking theory that when business and industry are depressed and banking funds are abundant, government securities form an ideal investment."

"This theory assumes that when industry and business revive and there is a greater demand on the banks for loans, the government securities can be readily disposed of to the investing public. But it is a necessary implication that the amount of security so held should not be greatly in excess of the capacity of the investing public to absorb. It also is widely felt that if our various governments had to look to insurance, loan and trust companies and private investors as the chief purchasers of their securities, the increased difficulty of floating loans would operate as a curb on borrowing."

Mr. Morden said the aim of Canada should be to maintain national credit "by meeting obligations to the full extent of capacity, refunding our debt at lower rates of interest whenever opportunities occur, and reducing expenses."

Steady improvement in conditions does it appear "reasonable to hope that the world as a whole is gradually recovering from the great depression, which culminated the progressive economic and trade disaster that followed and had their origin in, or were as least precipitated by, the dislocation of the war."

## New Type Electric Bulb

Steam Light Latest Development In Modern Illuminating Methods

A cigarette can be lighted in a jet of steam made by a new type of electric light bulb invented in the lamp development department of the Nela Park laboratory of the General Electric Company in East Cleveland, Ohio.

Details of the new development have been made public. The "steam" light is one result of a revolutionary change in structure of electric light bulbs, made by a new art of welding metal to glass.

The steam bulb is about the size of a large house lamp. Set like a hood over its tungsten filament is a copper coil. This coil develops a jet of steam the size of a lead pencil almost instantly after the light is switched on. A piece of paper held in the jet curls up, smokes and turns to black ash. The steam with this burning power has a temperature of 1,100 degrees Fahrenheit.

## Opera Singer And Aviator

Toronto-Born Man Killed When Plane Crashed In England

Liassant Beardmore, Toronto-born opera singer and aviator, was killed when a plane he was piloting crashed in a field near Reading, Berkshire, England.

Beardmore was the first man to cross the English Channel in a glider. He made the flight June 19, 1931, landing perfectly at Stinglevert airfield, near Calais, after a flight from Lympne airfield, where he had been towed to a height of 12,000 feet and then released.

Beardmore, a lieutenant, was born in Toronto 59 years ago. He went to Germany before the war to study music and later to England, where he lived for many years.

## Forgot To Forget

One of our newspaper friends says the Windsor Daily Star brings a good story of the absent-minded professor who had suddenly found himself at a dinner which he didn't want to attend. The professor rambled on something like this: "I didn't mean to attend this affair tonight. I meant to forget to come, and I forgot to forget."

## Prince Rides Bicycle

When a Mongol prince, descendant of a long line of hardriding horsemen, abandons his pony for a bicycle, it is news in the frontier settlement of Kweihua, Inner Mongolia. Prince Khang, a leading Mongol dignitary, shocked his compatriots recently by appearing on the main street of Kweihua on a bicycle.

Luther Burbank developed the world-famous Burbank potato after accidental discovery of a potato seed ball growing on a vine. 2154

## GAINS AMBITION

Miss "Pam" Barton, 19-year-old British golfing star, who gained her ambition when she won the British Women's Open Golf Championship. Miss Barton will probably consider "P" her lucky number as this was the third time she had reached the final of this particular championship. On the two previous occasions she was defeated.

## Some Aristocratic Dogs

Up-Keep In New York Costs About \$613.25 A Year

A dog's life in New York costs \$613.25 a year—that is if the owner supports the aristocratic canine in the style to which its ancestors were accustomed.

The largest single item on the annual upkeep of a wire-haired fox terrier is \$240 for meals specially prepared, delivered and served by a canine caterer. For from \$15 to \$25 a month the caters will feed the New Yorker's dog, but one agrees that a genteel wire-haired ought to get along all right on the \$20 a month.

Then there is the exercising of the dog—a very considerable item in a city where all typists are thorough. A dog-walking agency will take over this burden for 50 cents an hour. Figuring that the dog gets a breath of air an hour a day and discounting a few Sundays and holidays when his master himself might do the exercising, the dog's exercise thus costs \$150.

A dog, authorities agree, should be groomed and conditioned every two weeks at \$5 a grooming and conditioning. Thus \$150 will take care of that for the year.

If a dog's master thinks anything at all of his pet he will have its picture taken yearly. The photographer will take three poses of the dog for \$25.

## Innovation In London

Demonstration Given Of First Talking Film Church Service

Choirs, organs and preachers may vanish from church services and give place to films if an experiment tried in London is successful.

At a large hall in a London suburb representatives of all churches attended a demonstration of a new kind of talking film and the first talking film service.

The film combines prayer and worship and the demonstration was arranged by the Cinema Christian Council to introduce it to the religious bodies.

Hymns and prayers were shown on the screen, the audience joining in, led by the unseen organ and leader.

It was explained afterwards that it was hoped to produce a full service of films for use in churches and Sunday schools.

## Keeps Track Of Relatives

Princess Elizabeth Puts Children's Photographs In Scrapbook

Her liking for history has lately led Princess Elizabeth to take an interest in her many relatives in Europe, and she is now making a scrapbook, in which she pastes all the snapshots and other photographs of the royal children in Europe as they come her way. She can indicate precisely what, if any, relationship they occupy towards her. The little Princess is extremely popular with all the members of the Royal family—the King and the Duke of Gloucester are her two prime favorites. She still refers to the former as "Uncle David," and greets him with the same enthusiasm and childish camaraderie that she has always displayed toward him.

Los Angeles has a daily Japanese newspaper with a circulation of 8,000.

## Was Partly Modern

Proclamation Of Coronation Date Broadcast To Empire

With forms and ceremonies inherited from the immemorial past, the date of the coronation of King Edward VIII. was duly proclaimed in London. But modern science and usage intruded even into medieval pageantry.

When the Earl Marshal, Duke of Norfolk, and his attendants stepped out upon the hoary walls of St. James's Palace, there was immediately in front of them a microphone to carry to the ears of the kingdom at large all that was said in the King's name. The proclamation set the date of the coronation at May 12, 1937. The date was announced in a special issue of the London Gazette.

While a fanfare blared from the silver trumpets of the Horse Guards, the Garter Principal King of Arms, with white-gloved hands, unrolled a long scroll nearly a yard wide. In sonorous tones he began his reading. The King's guard of Grenadiers stood at attention, and the great crowd hushed into silence. By means of amplifiers, every sentence was heard distinctly to the farthest limits of the throng. Farther away on the battlemented ivy-clad walls of the palace, stood members of the King's personal household.

Sir Gerald read the proclamation, "Declaring His Majesty's pleasure touching his royal coronation and the solemnity thereof." The reading took nearly 10 minutes. It opened with a reference to "the favour and blessing of almighty God" and spoke of his princely care for the preservation of the lawful rights and inheritances of our loving subjects.

## Big Prize For Air Race

Race From England To South Africa In September

Sir Alan Cobham announced that L. W. Schlesinger, South African millionaire, has given £10,000 (\$50,000) prize money for the proposed air race from England to South Africa to coincide with the British empire exhibition at Johannesburg.

Schlesinger is promoting the race with Cobham, himself a pioneer long-distance flyer, as consultant. The Johannesburg exhibition opens Sept. 15 and will run until Jan. 15, 1937. The air race proposal has the approval of the British air ministry and the South African government has promised every assistance.

Entire organization of the race will be undertaken by the Royal Aero Club of Great Britain and participation will be limited to British empire pilots and aircraft. In this respect it will differ from the London-to-Melbourne race of 1934 which was open to all-comers.

Cobham said Schlesinger's motive in arranging the event was the promotion of commercial aircraft and the furtherance of air interest on the part of citizens of the British empire. But chiefly, he said, the race was intended to focus attention on the Johannesburg exhibition.

Cobham added the race would show that the day was not far distant when it will be possible to spend a weekend in Johannesburg. Possibly, he predicted, the flight will be accomplished in two days.

## Feather In Your Cap

Phrase Originated From Custom Of Almost Universal

This phrase means that something is an honor to you. The allusion is to the very general custom in Asia and among the American Indians of adding a feather to the headgear for every enemy slain. The ancient Egyptians, the Persians and others had a similar custom, and it is still usual for the English sportsman who kills the first woodcock to pluck out a feather and stick it in his cap. The custom in one form or another seems to be universal. In Hungary at one time none might wear a feather but he who had slain a Turk, and it will be remembered that when Gordon quelled the Taiping rebellion he was honored by the Chinese government with the "yellow jacket and peacock's feather."

## New Comet Found

Will Be Visible To Naked Eye Late Next Month

The new Pettier Comet, first to be found this year and first to be visible to the unaided eye since 1927, will swing into the range of vision late in July, Harvard College Observatory announced.

Still 120,000,000 miles from the earth, the comet has increased its apparent brightness from ninth to eighth magnitude in the past few days, and by the end of July, before it starts to recede, it will be brighter than sixth magnitude and within 20 million miles.

It is estimated that a person has approximately one chance in 3,388 of being killed outright in an automobile accident.

"The women certainly are patronizing barbershops nowadays." "Yes, and it serves some of these talkative barbers right!"

A Leytonstone, Eng., confectioner constructed a cake model of Westminster Abbey. The model weighed a ton.

## To Have and to Hold

Men who are wedded to the practice of "rolling-their-own" honour and cherish Ogden's. They KNOW that Ogden's Fine Cut is a mighty pleasing tobacco, that it's always mild and soothing—the cigarette tobacco "to have and to hold." Now that better times are here, roll-your-owners everywhere are picking Ogden's because Ogden's is better. The package is better, too—because it has the purple easy-opening ribbon for removing the Cellophane. "Chantecler" or "Vogue" papers are the ideal mates for such a grand cigarette tobacco.

**OGDEN'S FINE CUT**  
P.S.—Your Pipe knows Ogden's Cut Plug.

## SELECTED RECIPES

### SHORTCAKE BISCUITS

4 cups flour  
4 teaspoons Magic Baking Powder  
1/2 teaspoon salt  
4 tablespoons shortening (1/2 butter, 1/2 lard)  
1 tablespoon sugar  
Milk, sufficient to make soft dough, about 2 1/2 cups  
Sift together three times flour, baking powder and salt. Cut in the shortening. Add sugar, mix well. Add milk to make soft dough. Turn on floured board. Pat or roll lightly to 1" thickness. Cut rather larger than ordinary. Bake in oven 250 degrees F. 15 to 20 minutes. When done split and spread with creamed butter. Put between biscuits some crushed and sweetened strawberries. The fruit may be covered with whipped cream, and the juice from the fruit poured round the dish or served at the table as many people do not like the short cake biscuit soaked with juice.

### Fond Of Tea

Reported To Be The Favorite Beverage Of King Edward

Ten is King Edward's favorite beverage. As Prince of Wales he often surprised local officials during industrial tours by refusing champagne, whiskey and beer which had been obtained specially for him, asking for a cup of tea.

The King drinks tea many times a day. As a young man he often burnt his fingers on the all-metal teapots at Buckingham Palace. He remembered this when discussing household arrangements at Buckingham Palace with Queen Mary. Result: Fifty heavy Queen Anne teapots of valuable Sheffield plate were packed off to Marlborough House, where the Queen is to live. They are being replaced by teapots with wooden handles—British Cavalcade.

"Of course, my dear, she's still very handsome, but you should have seen her 10 or 15 years ago when she was five years younger."

Just why is a woman happy in a new hat that looks like her old one.

**PURITY FLOUR**  
Best for all your Baking

## Famous Canadian Artist

Homer Watson Dies In His 81st Year

At His Home In Ontario  
Homer Watson, one of Canada's outstanding artists, died at his home near Kitchener, Ont., in his 81st year. He had been ill for several months.

In the same rural community where he died, Homer Watson was born in 1855 and began his art career without tuition of any kind.

In 1880 the Marquis of Lorne purchased "The Pioneer Mill," exhibited by Watson at the Royal Canadian Academy. This painting and another of Watson's early works, "Last of the Drought," went to the private collection of Queen Victoria. Watson's fame spread and he made several trips to England, exhibiting with the famous artists of his day.

His outstanding contribution to the history of the Great War was his panoramic "Valcartier Camp," done under assignments by the Canadian government in 1914.

## Has Become Favorite Flower

Rhododendrons Are To Be Found In Every Royal Garden

Mention of the rhododendrons that are being planted at Fort Belvedere and Royal Lodge recalls the fact that many years ago, when Prince of Wales and King Edward VII. had some enormous clump planted in the grounds of Marlborough House. They were greatly admired for a time, but before long His Royal Highness had them all uprooted. Later, these shrubs returned to favor at Marlborough House, but not until after the death of King Edward. Now they are to be found in every Royal Garden, and there is a particularly fine show at Sandringham.

## The Only Thing Left

At a court function, we are told, Premier Mussolini stopped and picked up a handkerchief which King Victor Emmanuel of Italy and Ethiopia had dropped, and was profusely thanked by the monarch. Well, His Majesty should be grateful. It's about the only thing left he can stick his nose into, states the Windsor Daily Star.

## Motor Highways Make Accessible Points of Interest In Canada's National Parks

Close to 700 miles of motor highways and secondary roads make accessible points of interest and beauty in Canada's National Parks, and each year this system of park highways is being extended to new areas of scenic grandeur. Resulting that to attract an ever-increasing flow of motor tourists to the National Parks, safe, easy riding roads must be provided. The Department of the Interior has gradually increased the mileage of National Park highways so that today major points of interest are now easily reached and the work of further extending the system goes forward.

Of special interest to motorists visiting Waterton Lakes National Park, Alberta—the Canadian section of the Waterton-Glacier International Peace Park—will be the new approach known as the Kennedy Creek-Belly River cutoff. This new highway will be open for traffic during this summer and will furnish a direct connection between Glacier National Park in Montana, and Waterton Lakes National Park in Alberta. From the south the new road leaves United States Highway No. 87 only a few miles north of Babb in Montana and runs in a westerly direction through the northeastern corner of Glacier Park to cross the International Boundary into the Canadian section of the park.

During the past few seasons considerable progress has been made on the Lake Louise-Jasper Highway. This road will link Jasper National Park, Alberta, with the parks in the "Three-Park Unit" comprising Banff, Kootenay, and Yoho National Parks, and offers motorists a scenic tour of unrivaled mountain beauty. Construction on the Jasper end totals a little more than 50 miles, while the road extends northward from Lake Louise for a distance of about 30 miles. When the remaining gap of about 60 miles has been completed the whole route promises to be one of the most spectacular on the continent from a scenic point of view, traversing as it does the great, infamously treacherous and rugged Canadian Rockies which lie east of the continental divide. Throughout its entire length the motorist will behold many awe-inspiring and magnificent views of the lofty peaks and glaciers for which the area is particularly noted.

A motor trip through the great National Parks of the Canadian Rockies offers splendid opportunities to become acquainted with nature in her most magnificent setting. It would be difficult indeed to find more charming and majestic scenery than that in these mountain parks. Motorists who visit the National Parks of the Rockies for the first time are agreeably surprised at the extent and excellence of the countless and well-graded scenic highways, all of which are kept in the best of condition during the touring season. In selecting the route for a new highway the needs of the tourist and general motorist have been considered so as to ensure easy gradients, safety, and awe-inspiring views. With the exception of Glacier National Park on the summit of the Selkirk range in southeastern British Columbia, reached only by rail, all National Parks in Western Canada are accessible by motor car.

Accommodation in the National Parks of the Canadian Rockies may be had at a number of hotels, ranging from the modest-price to the most luxurious—rooming and boarding houses, bungalow camps, cabins, and motor campsites. Special attention is given to the comfort of campers and cottagers in order that afterwards their visit may be not only a delightful holiday memory but a source of renewed vitality. Visitors are assured of courteous and hospitable treatment wherever they choose to stay.

### Building Plans

#### British Government Speeding Up Plans For Production

The British government, laying plans for a speeding up of military plane production, concluded agreements with two large motor companies for new factories to build framework planes.

The agreements were made with the Austin and Rover concerns.

Sir Thomas W. H. Inskip, the defence co-ordinating minister, announcing contracts in common, said: "The project for the new factories is immense; one of the best brains of the country designed it."

The prodigal son had returned. "Father," he inquired, "are you going to kill the fattest calf?"

"No," answered the old man, looking the youth over carefully. "I'll let it live. But I'll put you to work and train a lot of that fat off."

Minister—"I haven't seen you at the church lately."

Steady—"Don't worry about that, sir. You have lost my custom. I dine go anywhere else."

Mexico, the United States, and Canada, in the order named, lead the world in production of silver.

### French Capital Very Quiet

#### Toronto Man Found London Much Quieter Than Paris

No longer in Paris "Gay Paree," its hotels and restaurants are empty, its glittering night life has been extinguished, and the once-famous entertainment spots have become shoddy and fifth-rate.

This is the opinion of Jack Creed of Creed's Ltd., who has returned to Toronto from a month's business trip in Europe. Mr. Creed shook his head as he talked of Paris, the city of his youth.

"I recognized Paris by the street names, nothing else," he said. "It is almost unbelievable. There are no tourists there. The dollar is worth only 50 cents in France, and that is enough to keep visitors away. London has become what Paris used to be, and Paris has become what London once was. I spent my time in these two cities. In London there is a spirit of gaiety, of contentment. Business is good and the air of solidity is more noticeable than ever."

"The stores in London are attractive and merchandise is well displayed," said Mr. Creed. "London has displaced Paris in many things and I believe there will be a shift of the fashion centre from Paris to London. There are great prospects for business in London. Contrast it with Paris. Frenchmen today are nervous. They don't know what is going to happen tomorrow. When I was in Paris in 1928 it seemed as though the city were dying. Now it is dead. There is no talent in the night clubs. The Polles Bergeres are tenth-rate. Paris is still the style centre of the world, but even this is changing."

"In past years only about two per cent. of American buyers went to London to purchase merchandise. This year about 60 per cent. of them went to London first and then visited Paris. London now is the home of those artists who create style. There are greater opportunities in England than in Paris."

### Empire Immigration

#### Scheme Is Approved At Meeting Of The I.O.D.E.

A resolution that the governments of Canada and Great Britain give consideration to a scheme of empire immigration was approved unanimously by the National chapter, Imperial order, Daughters of the Empire, in annual meeting in Winnipeg. The resolution, sponsored by the Saskatchewan chapter, will be forwarded to the Dominion government. It requested federal authorities to get in touch with the government of Great Britain "with a view to putting forward a scheme for the voluntary redistribution of the white people of the empire and thereby creating a stimulation of shipping and trade under the flag."

A resolution, presented by the Saskatchewan chapter, that pamphlets on naturalization be supplied by the Dominion government was passed by the members. Speakers suggested the members be made more familiar with the rights and duties of naturalization.

### Not To Be Outdone

#### Little Scotch Girl Matched Story With Better One

Two little Scotch children were boasting about their respective soldier fathers. "My father's a soger," said one little girl.

"My father's a soger, too," retorted the other.

"Ay, but my father's a brave man, a terrible brave man," persisted the other; "he's been in a war an' he's got medals, a terrible lot o' medals; and he's got the Victoria Cross, an' the King fastened it on wi' his ain han'!"

"But my father's a braver man than yours," said the other, sticking up valiantly for the honor of the family, "an' he's been in a lot o' wars, an' he's got dizzens and dizzens o' medals an' Victory Crosses, an' he's got a wudden leg 'at the King nailed on wi' his ain han'!" — Montreal Star.

### Leader In Hat Styles

#### Duchess Of Kent Introduces Many Types To London

The slim, vivacious Duchess of Kent today is a leader in new hat styles for women of Great Britain. Past seasons from Paris, such jaunty and sophisticated millinery creations to the former Princess Marina of Greece who has introduced so many types they cannot be counted. Her particular hobby, her friends assert, seems to be to wear a new hat each time she appears in public, and milliners speedily offer copies of her new hats to English women.

If left on the tree after becoming ripe, or orange-colored, the Valencia orange often turns back to its original green color; thus, some green oranges are overripe.

Aeroplane catapulted from the decks of warships attain a speed of six miles an hour at the end of a 60-foot run.

Rulers of ancient Persia and Assyria exchanged gifts of jeweled sandals as symbols of their royal affection.

The new Plough—invented by civilization. —"El Sol", Madrid.

### No Ice In Iceland

#### Hardly Enough Even In Winter To Skate On

Arni Jonsson, Iceland journalist, landed in New York to give the following explanations of his country and countryside:

1. There is practically no ice in Iceland, even in winter.

2. Icelanders are the tallest of races because they eat mainly fish.

Mr. Jonsson came to America aboard the Iceland steamer Katla, which, according to the cargo agents, was the first ship flying the Icelandic flag to dock in New York since 1923.

The vessel, of 1209 gross tonnage, left the capital of Iceland, Reykjavik, April 17, with a cargo of 900 tons of salt fish consigned to Gloucester, Mass., New York, and Cuba.

"Now," said Mr. Jonsson, "among other things, we should like to correct for once and for all the widespread belief that Iceland, because of its name, is eternally covered with ice. That is not so. In fact, Reykjavik, the largest city with 35,000 inhabitants, hardly ever has a speck of ice. During the winter we have to drive miles into the country to find enough ice and snow to ski and skate on."

### War On Wolves

#### Aeroplane To Be Used To Hunt Down Packs In Alaska

Plans for an aeroplane attack on savage packs of Alaskan wolves were worked out by three United States government agencies.

Explaining "because of the vast open spaces in northern Alaska it is difficult to approach packs of wolves unobtrusively and kill them by shooting," officials said they planned also to ask the help of reindeer herders in trapping them.

The expenses of an experienced trapper will be paid jointly by the biological survey and the reindeer service. The office of Indian affairs is supplying traps and other equipment. The trapper will travel by aeroplane.

As an example of the wolves' activities, officials said more than 100 reindeer of Barter Island were killed despite patrol's carrying lanterns. Emphasizing the seriousness of the situation, Indian office officials said many Eskimos were without food except for that provided by the government.

Synthetic butter has been patented, a chemist points out, but dairy interests hold the patent to safeguard the natural product.

One of these days you won't have time to do the things that you plan to do one of these days.

Rhode Island, smallest state in the U.S.A., is the most densely populated.

### New Subject For Study

#### Suggestion Made To Teach School Children Safe Driving

As announced recently A. F. Falls, formerly of Chatham, and now residing in Amherstburg, Ontario, believes that safety in the driving of motor cars should be taught in the schools. The idea is to "train them young" and then when these scholars grow to womanhood and manhood they will have firmly impressed upon their minds the necessity for care in driving. In this way, he believes the accident toll of the future may be greatly reduced.

Mr. Falls' suggestion is meeting with a favorable response in many quarters, and the Montreal Star discussing his scheme endorses it as follows:

"It is generally recognized that the young driver, with the careless temperament of youth, offers a special problem. A high proportion of automobile accidents must be laid upon 'youth at the wheel.' But whether this were the case or not, obviously the time has arrived in this automobile era when safe driving should be generally taught, and the time to inculcate safe principles is when the pupil is young and impressionable." —Chatham, Ont., News.

### Bagpiper Renews Concepts

#### Member Of Parliament At Ottawa Plays In Moonlight

Warm weather has brought the wailing of pipes to Lover's Walk, the slope beside the Parliament Building in Ottawa.

Tom Reid, British Columbia Liberal, who is known as "The piper on the Hill" and who practices on his bagpipes in his room every night after supper, is again taking to the outdoors, playing in the moonlight.

Recently his bagpipes almost became a matter of political debate when it was found that he used "New Orleans molasses" to keep the leather bag soft.

He said that there are extravagant pipers who use whiskey and sugar to keep their pipes in shape, but he finds such measures "far too dear."

In 1921, Tom Reid took a walk with his pipes in the moonlight after the Royal Canadian Mounted Police had sent all the strolling lovers from the walk. As he walked and played, Reid was suddenly approached by an officer with a pistol.

"You can't do that here," the officer cried.

"But I'm daein it, was the Scotsman's bland reply.

Milk cows are generally used for plowing in Frieburg, Germany, gateway to the Black Forest of Germany.

Thirty-three thousand persons are now employed in rayon yarn factories in Japan.

### A Lacy Sailor That Dips Or Rolls

PATTERN 5647

If you're fashion smart this season, and intrigued by a bit of easy crochet, you'll let smartness "go to your head" in the form of a lacy "sailor" hat. Quickly crocheted in string, the same lacy stitch is used throughout to make the version that rolls so prettily "off face." Directions for crocheting the flowers—and how necessary they are to the smart woman this season—are included.

In pattern 5647 you will find complete instructions for making the hat in both ways and the flowers; an illustration of them, and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Wild Plant Study Leads To Discoveries Proving Of Economic Value

### Geologists Go North

#### Two Parties Sent Into Far North This Summer

Two geological parties will be sent into the little-known Canadian North this summer by the Dominion Department of Mines, with instructions to carry examinations as far north as the Arctic Circle. Each party will be composed largely of students of geology and mining from the University of Alberta, and the University of Saskatchewan, with enough trained geologists to permit the operations of sub-parties.

Last year the Department of Mines mapped a 10,000-square-mile area in the vicinity of the Yellowknife River basin, northeast of Great Slave Lake, approximately one-third of which has been defined as excellent prospecting ground for precious metal deposits. One of the parties will this year undertake the examination of a 10,000-square-mile area to the northwest of Great Slave Lake. Nothing is known of the geology of the area, with the exception of a narrow strip along the Taltson River, which was examined in 1914. This initial exploration indicated the presence of belts of greenstone, which suggest the occurrence of mineral deposits. Work this summer is designed to trace the extensions of these favorable belts, to locate and map other similar belts in the region, and to examine known mineral occurrences, including the recent gold strike east of Taltson River.

The other geological party will make a detailed examination of the mining properties located between Lake Athabasca and Great Bear Lake. These include the gold deposits on the north shore of Lake Athabasca and on Outpost Island, Yellowknife Bay; the pitchblende deposits at Hottah and Hardisty Lakes; and the deposits of radium and silver ores at Echo Bay, Great Bear Lake.

Commercial aircraft will be used extensively in the work of the two parties as it has been in all recent mining operations in the North. Aircraft will be used for initial reconnaissance work; for the transportation of men and equipment to favorable locations; and as a means of maintaining contact among the several sub-parties.

### Value Of Milk

#### Is An Excellent Food For Those Who Are Underweight

A study of milk consumption recently conducted in a metropolitan centre on this continent reveals the fact that diversity of opinion exists regarding the "fattening" qualities of milk. Of the two thousand adults interviewed, sixty-one per cent. of whom were women and thirty-nine per cent. men, over two-thirds expressed the belief that milk is a fattening food, and the remainder, that it helped to reduce weight. In both cases the percentage was about the same for milk drinkers and non-milk drinkers.

It may seem strange to say that both opinions are correct, but such is the case. When milk is taken, either at or between meals, in addition to the amount of foods which keeps an individual at constant weight, it is natural that it will have a tendency to increase weight. On the other hand, because milk has a low caloric value compared with many foods, it is an important factor in the diet for reducing abnormal weight. The first requisite in every diet, whether it be one for reducing, increasing or maintaining normal weight, is the inclusion of foods which will furnish the building and regulating material. Milk supplies more nutrients to the body than any other single food and should be given a prominent place in meals planned to "safely" reduce body weight. For the same reason milk is an excellent food for those underweight to use generously, since it adds, not only calories, but essential minerals and vitamins to the diet.

It is easier to use extra amounts of milk than most other foods, as it can replace beverages lacking in nutritive value, and it can be taken between meals and at bed time without interfering with the regular meals. Then, too, milk is palatable and blends well with other foods.

Milk cows are generally used for plowing in Frieburg, Germany, gateway to the Black Forest of Germany.

Thirty-three thousand persons are now employed in rayon yarn factories in Japan.

### Longest Lightning Rod

Los Angeles now boasts of the longest lightning rod in the world. It consists of wires above and below the steel towers of the Boulder Dam power transmission line terminating there and is expected to carry off strokes of lightning over a distance of 230 miles.

A parachute would be worthless on the moon, for there is no atmosphere.

The "elephant" shrew is one of the world's smallest animals.

During his lifetime, the average man shaves 20 square miles of face.

American women use a total of 2,375 tons of rouge every year.

### It is well known that some plants are of economic value as food, drugs, fibre and oil-yielding, and that others are noxious or poisonous, but the numerous inquiries received each year by the Division of Botany, Ottawa, show that many people do not know in which category certain of our wild plants should be placed. Some of the correspondents now enjoy palatable health-giving dishes of native fruits that they previously shunned as poisonous, while others have been warned against harmful and in some cases, deadly poisonous fruits which they thought to be edible. Plants have been identified that have caused, or may have caused serious illness, or even the death of human beings as well as of livestock, and all persons would be well advised to obtain reliable information before sampling wild fruits or vegetation of any kind about which they have any doubt.

To facilitate this important work of identifying plants, the Division of Botany maintains an extensive collection of native Canadian plants which are carefully preserved and which form the "herbarium," well known to botanists and to all who are interested in the wild plant life of Canada. This collection contains some fifteen thousand mounted specimens, most of which were collected by members of the botanical staff during their field work over a period of many years, while others were taken from the many hundreds of specimens sent in year by year for identification from all parts of the Dominion.

The collection is readily accessible not only to members of the staff but also to the public for reference and for the comparison of plant specimens, and small herbaria have been established in many institutions.

Although inquiries concerning the edibility of wild fruits are so numerous, they form but a small part of the requests received by the staff of the herbarium. Information regarding noxious weeds is continually in demand. These weeds appear in new localities each year. The fact is clearly shown by the valuable weed survey conducted by the Division of Botany, which is also responsible for many additions to the herbarium each year.

The identification of grasses also forms a large part of the work of the herbarium. As is well known, grasses are one of the most important groups of plants, as they enter so much into livestock food value, and in the formation and upkeep of lawns. Some species are numbered among the noxious weeds.

The Dominion Botanist is always pleased to hear from amateur botanists, especially those who are willing to send specimens that might add to the value of the herbarium. Many valuable contributions have already been made by correspondents throughout the Dominion, and other contributions will be gratefully acknowledged.

### Rail-Highway Truck

#### Wheels Are Combination Of Tires And Steel Flanged

A new rail-highway motor truck recently made a run from Akron to Cleveland over Baltimore & Ohio railroad tracks, turned off the rails at West Third Street, and proceeded to its destination. The truck has combination wheels, which carry the special truck tire beside steel flanged railway wheels. It is driven onto the rails at any crossing. The rubber tires are then deflated, so that the truck settles down with its steel wheels on the tracks. The front wheels are locked when the truck is on the tracks and the driver has no steering to do. When it arrives at its rail terminus, all four of the tires are inflated simultaneously from the engine by the same air-system that is used for brake operation—Scientific American.

### Defining A Cannibal

A cannibal is one who loves his fellow man, says the Ottawa Journal. He also is one who gets around other human beings, adds the St. Thomas Times-Journal. And according to the Chatham News, he is one who gets along well with people, because he can stomach anybody. But, states the Toronto Star, the plain fact is that a cannibal is a cheat; he's always taking other people in.

### Very Dependable

"My goah, Bill," groaned the managing editor of the tabloid, "nothing scandalous has happened in four hours. What'll we do for the front page?"

"Aw, don't get discouraged, Steve," the city editor comforted. "Something will happen. I've still got faith in human nature."

### Courses In American history were not introduced in schools of many European countries until after the World War.

Fishes that live near the surface of the water have large eyes, while those that live deep have small and weak eyes.

## SMALL DIVIDEND WILL BE PAID

Payment of a small dividend to shareholders in good standing was decided on at the semi-annual meeting of the Lacombe U.F.A. Co-operative Trading Association, Ltd., held recently in the Town Hall, with a fair number of the shareholders present.

Out of the business of the meeting some discussion took place regarding the property owned by the association, and it was felt it should be retained until it could be sold to better advantage and at a commensurate value.

The following new board of directors was elected: O. S. Young, chairman; J. M. Douglas, managing director; J. A. Bradley, John Ellis, P. S. Cull, F. B. Stewart and H. S. Trame.

## Calf Club Sale And Show July 3

A Calf Club Show and Sale will be held by the combined Lacombe and Red Deer Calf Clubs on Friday, July 3, in the Central Alberta Pavilion on the Lacombe Fair Grounds. The calves from the Lacombe club will be judged on this day, the Red Deer calves having already been placed, but both lots, comprising some 40 well-finished calves, will be up for auction.

The program begins at 10 a.m. with a lecture and demonstration by a member of the University staff, this to be followed by a boys' and girls' judging competition. At 1:30 p.m. the calves will be officially placed; then, after the annual meeting of the club, they will be shown, to round out the day. This show and sale will be of considerable interest to the public as a whole, as the calves are high-grade baby beef and will serve as a good object lesson.

## Clive

CLIVE—Mrs. D. Will, daughter Marjory and Mrs. Oscar Westling left Tuesday for the coast. Ted Sissons shipped 50 head of beef cattle Tuesday. Two cars of these cattle go to the Old Country. Mr. and Mrs. R. H. Haskins and D. Spink motored to Vancouver to spend their summer holidays.

The Sports Day held here on June 27 was well attended. Over 100 children under 12 years of age were given 5c each. The day was taken up with sports and in the evening a play was staged by local artists. Mr. Chapman of Rimby has moved here to take charge of the U.G.G. elevator.

Mary Allison, Frances Reynolds and Norma Longstreet were very successful in their music exams. Mr. and Mrs. Perkins, from Eastern Canada, are visiting Mrs. Perkins' niece, Mrs. E. L. Reynolds. Rev. Mr. Kettle of Canmore has arrived to take up his duties.

Mrs. T. A. Breerton is visiting her parents this week. Born to Mr. and Mrs. E. L. Reynolds, a daughter.

Mrs. Northern has gone to Edmonton to take up residence.

**LACOMBE LOSES TO PONOKA**  
Filling in for an American barnstorm team which was billed to play at Ponoka on Dominion Day with only a day's notice, Lacombe supplied a team to take their place and played nine innings, the score resulting, Ponoka 13, Lacombe 3. Edgar Todd led the Lacombe hitters with three hits out of four times at bat.

## U. F. A. Convention Draws Large Crowd

A large crowd attended the Wetaskiwin Federal Constituency Convention of the U.F.A., held in the Elks' Hall, Ponoka, last Friday.

There were delegates from as far north as Edmonton and the Spruceville delegates represented the extreme south, Bentley, Hymby, Clive, Millet, Ladue, etc., were all represented. The mayor of Ponoka welcomed the delegates and visitors in a very fine address. He paid a sincere tribute to the U.F.A. group that served Alberta for 70 years in Ottawa and spoke of them by the name they are known by throughout the world—"The Ginger Group." He also showed a knowledge and great respect for U.F.A. ideals and the main objective, "Equal rights for all." He concluded with a plea for the young people.

During the afternoon the president, Mr. Haskins of Clive, very ably handled the meeting. Several interesting resolutions were brought up for consideration and owing to lack of time some were referred back to the board. Some of these resolutions, however, were passed without discussion. Those on education were debated on at great length.

Much indignation was expressed when one delegate, a school trustee, stated that he had been informed by an inspector that Grade Nine was to be discontinued in the rural schools. It was felt this would create a great hardship on children who were considered by their parents too young to go to town schools, and where parents could not afford the extra cost involved.

Other resolutions dealing with the Sales Tax, C.G.F. and other problems were passed.

Many Speakers  
Speakers included the three directors for the constituency, Mrs. Ray Carter, U.F.W.A.; Miss Blanche Paulsen, Juniors, and H. E. Heath, U.F.A. The last named, owing to the heavy program, spoke briefly, but emphasized the need of the U.F.A. in rural communities.

Mrs. Ray Carter pleaded for support of the new farm paper, "The Western Farm Leader."

Mr. Gardiner, the guest speaker, gave a splendid address. High lights of his speech included a practical answer to the query: "Has the U.F.A. done anything for the farmer?" He dwelt in detail on the results obtained by the U.F.A. group in the House of Commons. He also emphasized how much he deprecated the necessary duplication caused by C.G.F. clubs being formed in the rural districts where there are already U.F.A. locals. By right of the U.F.A.'s affiliation to the C.G.F., all U.F.A. members are "in" the C.G.F. Mr. Gardiner also dealt in a practical way with the much discussed subject of "lack of purchasing power."

During the afternoon two musical numbers were given and in the evening a splendid play, "Yimmy Yonson's Yob," was ably presented by the Clive players, which was followed by a dance.

## FOOTBALL

Edmonton Hearts defeated Lacombe 5-0 in a game of soccer at Gull Lake on Dominion Day.

## Lacombe Defeats Eckville and Clive

To celebrate the opening of the local baseball season, Lacombe boys strutted their stuff to score victories in their first two home games.

Without much trouble the locals plastered a 7-1 defeat on their Eckville rivals last Thursday and on Monday handed Clive a 6-4 setback. A return game will be played at Eckville, Friday, July 3.
